

Facial iD™

3D Printed patient specific plating

Orthognathics

**Midface and
mandible trauma**

Midface reconstruction

Facial iD

3D Printed patient specific plating

VSP by 3D Systems

Provides expertise in pre-surgical planning, patient specific models, guides and templates.

Design flexibility

Allows for variation in implant complexity and choice of screw diameter to fit your surgical needs.

Enhanced visualization

Receive real time feedback while precisely planning screw hole location, bar width and plate thickness around critical anatomy.

Intraoperative modification

Implants are made of commercially pure titanium and slight changes can be made intraoperatively.

This document is intended solely for the use of healthcare professionals. A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery. The information presented is intended to demonstrate the breadth of Stryker's product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use, including the instructions for cleaning and sterilization (if applicable), before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Stryker Corporation or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: Facial ID, Stryker. All other trademarks are trademarks of their respective owners or holders.
