Driving
performance,

**delivering
versatility**

**Spetzler-Malis and SILVERGlide
Non-Stick Bipolar Forceps**

Your **superior experience** starts with our people

Supporting you throughout your procedures

People

Our people stand out. They're dedicated, highly skilled experts that care deeply and listen carefully. When you need a partner in improving care, we're by your side.

Culture

We create a dynamic, supportive environment that enables amazing people to do amazing things. Count on us to do what's right and deliver—every time.

Product innovation

Innovation is in our DNA—from Dr. Homer Stryker to the researchers, engineers and surgeons creating solutions that are reshaping neurotechnology today.

Medical education

Innovation and skill come together in our educational outreach to providers. Each year, we help surgical teams around the world master the latest medical technologies and care practices.

Research and development

We amplify our investments in R&D by listening to our customers and collaborating with them to create solutions that are simply superior.

Outcomes

We share your values and your commitment to innovative care that heals effectively and efficiently. With you, we're driven to make healthcare better.

All of our non-stick bipolar forceps **resist tissue buildup** and provide **excellent visualization**. Regardless of your preference for single-use Spetzler-Malis or reusable SILVERGlide, you can expect **precision, control** and a responsive extension of your hands and eyes from us.

Disposable Spetzler-Malis

Standard Bipolar Forceps

Flexible lightweight cord and remote connection plug helps achieve balance

Spring force elevates control and tactile feedback

Single use ensures excellent tip alignment and coagulation performance

Sleek bayonet design improves visualization

Non-stick technology enhances performance

SILVERglide Non-Stick

ProSeries Bipolar Forceps

Standard two-pin round connector
works with most standard foot-switching bipolar electro-surgical generators

Silver plating
reduces collateral heating, "hot spots" and sticking for efficient performance

Ultra-thin tines
allow better access in surgery

Lightweight handle
for easy manipulation and balance

Guide-stop
minimizes scissoring and increases control

What sets SILVERGlide apart?

The elimination of tissue buildup allows you to work without interruption. These non-stick characteristics continue to perform use after use. The SILVERGlide alloy's level of thermal diffusivity is 37 times higher than that of stainless steel commonly used in forceps.

	Standard forceps	SILVERGlide Non-Stick	
"Hot spots" from sparks occur during coagulation			"Hot spots" start to occur during coagulation
The "hot spots" cause localized sticking			Heat is diffused rapidly to prevent sticking
Tissue seared to the forceps tips is ripped away			The forceps can be removed without tissue sticking
