

5G Fixed Wireless Access: Powering Your Business with Unmatched Connectivity

The Struggle for Business-Grade Internet: Today's Challenges

Modern businesses thrive on reliable, high-speed internet. Yet, traditional wired options can be frustratingly limited, plagued by:

- **Limited availability:** Rural and underserved areas often lack access to fiber or cable connectivity.
- **Costly installation:** Digging trenches and deploying physical infrastructure can be expensive and time-consuming.
- **Scalability constraints:** Fixed lines are difficult to adjust as your business grows or migrates locations.
- **Performance inconsistency:** Download speeds can fluctuate depending on network congestion and infrastructure limitations.

These challenges stifle productivity, hinder remote work capabilities, and impact customer service. Businesses need a smarter solution.

5G Fixed Wireless Access: The Game Changer

T-Mobile Business Internet unlocks the power of 5G, delivering reliable, high-performance internet without the constraints of traditional options. It leverages the nation's fastest and most extensive 5G network, bringing several advantages:

- **Widespread availability:** Reach previously underserved areas with an expansive 5G coverage map covering 98% of the U.S. Population.
- **Quick and easy setup:** Get connected in days, not months, with no complex installation processes.

- **Flexible scalability:** Increase or decrease bandwidth seamlessly as your business evolves.
- **Consistent performance:** Experience reliable speeds, even during peak usage hours.

T-Mobile Business Internet: Your Competitive Edge

Beyond the inherent benefits of 5G, T-Mobile Business Internet stands out with unique features:

- **Unlimited Data:** Never worry about exceeding usage limits and incurring overage charges.
- **Static IP Address:** Maintain dedicated addresses for secure server connections and business continuity.
- **Dedicated Business Support:** Receive priority assistance from expert technicians trained to resolve business-specific issues.

Cellhub Partnership: Certified Routers & Device Subsidy

Through our partnership with T-Mobile and Ingram Micro, Cellhub, partners can access an exclusive offer:

- **\$700 device subsidy:** Purchase select certified routers with a \$700 device subsidy when bundled with a qualifying 3-year T-Mobile internet plan.
- **Expert advice:** Leverage Cellhub's expertise in choosing the perfect router for your specific needs and network configuration.
- **Seamless implementation:** Enjoy professional installation and configuration services for a hassle-free start.
