## COMFIT AFO

AFO/FXX

Comfit AFO is suitable for patients suffering from foot drop. Thanks to its innovative design, the product is easy, flexible and comfortable to use. The lateral strut rests close to the foot and lower leg without coming into conflict with the malleolus, and it is exceptionally comfortable inside the shoe. The calf-piece is anchored by a padded tibia strap while a high level of flexibility in the sole and the strut make it easy to lift the forefoot and allow for a secure and stable gait.

### Features

- Carbon fiber cleat
- Foot drop orthosis
- Flexible design
- Lateral strut
- Posterior calf-piece
- Padded tibia strap
- Weight approx. 125 gram

**Material:** Carbon Fiber

**Height:** Small 30 cm, Large 33 cm

### Indications:

Foot drop  
Bilateral foot drop

### Contraindications

Spasticity  
Highly active patients

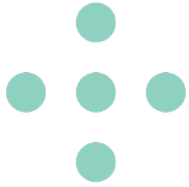

Part Number	Size	Euro Shoe Size**	USA Men's Shoe Size	USA Women's Shoe Size

## COMFIT X-STRONG AFO

AFO/RXXX

Comfit X-Strong AFO has the same design and fit as Comfit AFO, but the structure is made from fiberglass for even greater flexibility and robustness. This model is primarily recommended for users who subject their AFO to considerable wear and tear, and particularly for patients with bilateral needs. The surface is covered in a carbon fiber film for a smoother surface and slick finish. For patients who need more room around the lateral malleolus, there is a Wide model available.

### Features

- Fiberglass cleat
- Foot drop orthosis
- Slender design
- Lateral strut
- Posterior calf-piece
- Padded tibia strap
- Weight approx. 175 gram

**Material:** Fiberglass & Carbon Fiber

**Height:** Small 30 cm, Large 33 cm

### Indications:

Foot drop  
Bilateral foot drop

### Contraindications

Spasticity  
Highly active patients
