Most universities and colleges will accept BTEC qualifications too, with Level 3 National BTEC qualifications converting readily and easily to UCAS points. Under this points system, you can gain entry using either A-levels, BTEC qualifications or a combination of both. What are BTECs? BTECs are practical, vocational, work based courses, which also include key theory elements. They are named after the Business & Technology Education Council, which first introduced them back in 1984.

MM	64
MP	48
PP	32

They are currently run exclusively by the Edexcel exam board. What can I study on a BTEC course? BTEC courses cover a wide range of different fields, although as you would expect, these are mainly practical subjects. BTEC courses include areas such as: Art and Design Business Studies Computers Construction Engineering Hair and Beauty Health and Social Care Hospitality and Tourism Media Music and the Performing Arts Public Services Science (applied) Sport Levels of BTEC BTEC qualifications have various levels, from introductory BTECs at level 1, through Level 2 BTECs which are the equivalent of GCSEs, Level 3 BTECs, also known as Nationals, which are the equivalent of A levels, to level 5 BTECs, also known as Higher Nationals, which can be the equivalent of a degree.

BTEC levels beyond this also operate; these tend to be shorter courses aimed at working people who wish to maintain their continued professional development or CPD rating. Grades of BTEC Under the previous National Qualifications Framework (NQF) system, BTECs were classified as a Diploma, a Certificate or an Award until 2010 depending on the number of units undertaken, with each unit graded as a Pass, Merit or Distinction. These were then replaced with a new Qualifications and Credit Framework (QCF) classification, with a new Distinction* grade. The new BTEC classifications are as follows: New QCF classification Old NQF classification Certificate N/A Subsidiary Diploma Award 90 Credit Diploma N/A Diploma Certificate Extended Diploma Diploma The type of award, and the grades for each unit, will dictate how many UCAS points a BTEC is worth, with a Level 3 Subsidiary Diploma Pass worth 40 UCAS points (equivalent to an A level grade E), and a Level 3 Extended Diploma with triple Distinction* being typically worth 420 points (equivalent to three grade "A*" A levels). For a more detailed examination of how BTEC qualifications convert into UCAS points, please see our related article on BTEC UCAS points – how do they add up? Advantages of a BTEC BTEC courses suit students who are more practically minded, allowing them to demonstrate their skills and understanding outside of the purely academic, exam focused arena. BTECs give credit for real life experience, rather than just book learning, including work experience, hands on training and industry placements. BTEC courses are designed in conjunction with industry, to ensure that students are given the training and knowledge that industry needs. Universities also have an input into BTEC course design, with the aim of helping less 'academic', but still highly talented, students to progress to university and on into successful careers. BTEC as an alternative route to university As BTEC courses do not place all their emphasis on written exams, they offer an alternative route into university for students who do not perform to the best of their ability under exam conditions, but who are still very able and capable individuals. A-Levels results day is here, and thousands of students around the country will be eagerly waiting to find out if they will be going to college or university next year.It has been a difficult few years for pupils, and as such the exams will be marked in a way that will "recognise the disruption experienced by students taking exams in 2022". Each grade is worth a set number of points on Ucas, and this will inform your university's decision. Here's everything you need to know about how it works.Most universities and other higher education providers tend to make offers based on specific grades being attained.However, some use Ucas Tariff points, with the admissions body estimating that around a third of its courses use these as an entry requirement.Ucas points essentially translate your qualifications into a numerical score, allowing students greater flexibility in how they qualify to study their chosen course.Beyond establishing admissions criteria, the scores are used by universities to report data to Government bodies.Ucas has its own calculator here – you can use the drop-down boxes to input your qualifications and grades, and your total will automatically be calculated.There is also a full, in-depth guide to all manner of qualifications here, with everything from Btecs to the International Baccalaureate.However, Ucas also advises that not all qualifications attain points, so you shouldn't worry if yours doesn't feature in that guide – very few international qualifications are included, for example.For A-levels the grades are awarded Ucas Tariff points as follows:A* – 56 pointsA – 48 pointsB – 40 pointsC – 32 pointsD – 24 pointsE – 16 pointsA-levels are considered Level 3 exams, but the points can be gotten with Btecs too.Students studying Btecs are given one, two or three grades, depending on the size of their course. For a certificate, extended certificate and foundation diploma you receive one grade, for a diploma you receive two and for an extended diploma you receive three.Ucas Tariff points are awarded as follows:Distinction* – 56 Ucas points (equivalent to A* at A-level)Distinction – 48 Ucas points (equivalent to A at A-level)Merit – 32 Ucas points (equivalent to C at A-level)Pass – 16 Ucas points (equivalent to E at A-level)A-level results day falls on Thursday 18 August, with grades typically available to collect from schools and colleges at around 8am.Times vary from place to place, though, and grades have previously been released by exam boards under embargo at 6am.You should check with your institution or teachers to confirm when to arrive to collect your results.Your school or college should have already told you if it is possible to receive your results by email or by post.If you are receiving an email, it should also come at around 8am, while posted results will arrive with the rest of your mail.Examiners were asked to grade papers more leniently than in previous, pre-pandemic years, to compensate for the disruption Covid has had on pupils' learning.Grade boundaries could be relaxed in some cases, with a lower score across papers needed to secure a particular grade, but markers' generosity could also be more far-reaching.Ofqual chief regulator Dr Jo Saxton said: "Our grading approach will recognise the disruption experienced by students taking exams in 2022."It will provide a safety net for those who might otherwise just miss out on a higher grade, while taking a step back to normal."Ofqual said this summer's grade boundaries will be set roughly between 2019 pre-pandemic levels and boundaries in 2021, when teacher assessment was used to set grades.Schools minister Will Quince said it was important to "move back to a position where qualifications maintain their value" and reassured students that grades will still be higher than in 2019.AQA says: "Grade boundaries show the minimum number of marks you need for each grade, and are published on results day."Once all exam papers have been marked, grade boundaries are set by senior examiners and assessment experts. It's not until after all the marking has been completed that it's possible to see how difficult students found the paper (for example, compared to previous years) and so take this into account when setting the boundaries. This means that a student who performed at a certain level should get the same grade regardless of which year they sat the exam."Ofqual will offer more generous grading of exams this year compared to a normal exam year – learn more about grading as part of exam changes in 2022."One of the pervading myths about Ucas Track is that it updates at midnight – it doesn't, so there's no point in staying up to check, however tempting that may be.Instead, the website typically opens between 8am and 8.30am on results day, after being frozen in the days leading up to it.Ucas Track doesn't show you the exact A-level grades you received, which students can only receive from their school or college.The online service simply tells you whether your specific university applications have been successful (although this can often give a strong indication of your precise grades).To access Ucas Track you will need your personal ID and password which was used when applying.Ucas advises that if your offer hasn't been changed to "unconditional" when you log in to Track, then wait until you've received your grades before calling them or the university.He also moved to assure students results day will not be impacted by the strike over pay at AQA, the country's largest exam board, from Friday 12 to Monday 15 August."I think young people have enough to worry about and be concerned about ahead of examination results anyway," he said."To add this into the mix, as a potential worry about whether their papers will be marked and their results will come through on time, is totally unnecessary."He added: "I've had assurance that they won't have any impact, but unfortunately scaremongering of this sort of nature by unions is deeply regrettable."In 2020, when exams were cancelled, the marking of A-levels sparked widespread controversy due to an algorithm devised by Ofqual which was accused of discriminating against the nation's poorer students and widening inequality.In the final results, nearly 40 per cent of A-levels results were downgraded from their teacher predictions, and the Government was ultimately forced to U-turn.As a result, the algorithm system was scrapped for 2021, when results were awarded based solely on judgements from schools instead, with "teacher assessed grades" calculated using classroom tests, mock exams and work completed throughout the year.You'll develop the practical skills and knowledge in programming, maths and engineering that will get you off to a flying start when you move onto BSc (Hons) Cyber Security in your second year. Protecting organisations from cyber-attacks is a valuable skill and graduates are highly sought after and it's one we'll prepare you for. You'll explore how to detect and identify security risks before building on this by developing your own preventative measures – all with plenty of opportunities to test your solutions in our industry-standard facilities. For more information please visit NT website: This is the deadline for applications to be completed and sent for this course. If the university or college still has places available you can apply after this date, but your application is not guaranteed to be considered. Course code:I130Institution code: N91 Campus name:Clifton CampusCampus code:2The following entry points are available for this course: We also consider equivalent qualifications and combinations. Please contact Nottingham Trent University Admissions team for further information. The Unistats dataset is produced by the Higher Education Statistics Agency on behalf of the UK higher education funding and regulatory bodies. It includes data from national student surveys, information collected from higher education providers, and other official datasets. It is published in full on
