Home » World Maps » World Map World Map - Political - Click a Country This is a large 38" by 48" colorful wall map showing the United States of America and state flags. More Information. Shown above The map above is a political map of the world centered on Europe and Africa. It shows the location of most of the world's countries and includes their names where space allows. Representing a round earth on a flat map requires some distortion of the geographic features no matter how the map is done. We have used a Mercator projection for this map because it is the projection most commonly used in schools. On this map, geographic boundaries that trend north-south appear as vertical lines, geographic boundaries that trend east-west appear as horizontal lines. This type of projection causes a minimum of country-shape distortion near the equator, a small amount of distortion at mid-latitudes, but extreme distortion near the poles. For that reason, the map does not extend to the north and south poles. This is a large 38" by 51" wall map with vibrant colors and good detail. Click here for more wall maps! Google Earth is a free download that lets you view satellite images of Earth on your computer or phone. Political maps of the world prepared by the United States Central Intelligence Agency. Zoomable .pdf maps of the world showing the outlines of major countries. Get a world outline map. View each of the 50 U.S. states in a large satellite image from the LandSat Satellite.

View States. The United States Central Intelligence Agency standard time zone map of the world in .pdf format. Easy-to-read. NASA's World Map of Earth's illumination at Night. gives you a simulated view of Earth from space at night. World maps showing the bathymetry, major physical features, and boundaries of Earth's oceans. Did you know that there are thousands of types of maps? Learn about the maps shown here and more. We have maps and information for almost every country in the world, from Afghanistan to Zimbabwe. This is a large 33" by 54" wall map with the world's physical features shown. More Information. Shown above The map shown here is a terrain relief image of the world with the boundaries of major countries shown as white lines. It includes the names of the world's oceans and the names of major bays, gulfs, and seas. Lowest elevations are shown as a dark green color with a gradient from green to dark brown to gray as elevation increases. This allows the major mountain ranges and lowlands to be clearly visible. This map is also a Mercator projection centered on Europe and Africa. A scale of miles is not shown on these maps because the scale changes with distance north and south of the equator. Scale is highly exaggerated as distance from the equator increases. The United States Department of State recognizes 195 "Independent States in the World". We have listed these countries below, and those that we have a map for are clickable.
