HYPERIMMUNE EGG*

WHY IT'S BENEFICIAL TO TAKE HYPERIG PL-100™

Too little inflammation may not provide sufficient response against dangerous invaders.

Too much inflammation, runaway inflammation like a fire gone wild, may attack previously healthy parts of the body resulting in autoimmune diseases (e.g., lupus, pernicious and hemolytic anemia, rheumatoid arthritis and diabetes).

BALANCE IS THE KEY

A strong, balanced immune system protects the body from dangerous invaders, such as bacteria, viruses, fungi and cancer cells.

Immune homeostasis (immune balance) requires an exquisite balance of immune co-factors and immune cells to maintain appropriate levels of inflammation.

"At the age of 50, I feel healthier than I have in many years. And I feel I am far more in control of my health with hyperimmune egg. My mood and attitude toward life has become more and more positive. I feel and act like a younger and healthy man. My ambition and youthfulness remind me of when I was in my early 20's."
