HYPERIG PL-100 BENEFITS

- 1 The original hyperimmune egg
- 2 Natural source of concentrated IgY antibodies and potent immune-regulating factors
- 3 Self-Affirmed GRAS (Generally Recognized As Safe)
- 4 Supports immune balance
- 5 Multiple patents
- 6 Peer-reviewed journal articles
- 7 Enhanced strength and muscle recovery with less muscle soreness

Consider HyperIg PL100 as part of your daily diet to keep your immune system balanced instead of in overdrive.

WHY IT'S BENEFICIAL TO TAKE HYPERIG PL-100™

Too little inflammation may not provide sufficient response against dangerous invaders.

Too much inflammation, runaway inflammation like a fire gone wild, may attack previously healthy parts of the body resulting in autoimmune diseases (e.g., lupus, pernicious and hemolytic anemia, rheumatoid arthritis and diabetes).

BALANCE IS THE KEY

A strong, balanced immune system protects the body from dangerous invaders, such as bacteria, viruses, fungi and cancer cells.

Immune homeostasis (immune balance) requires an exquisite balance of immune co-factors and immune cells to maintain appropriate levels of inflammation.

"At the age of 50, I feel healthier than I have in many years. And I feel I am far more in control of my health with hyperimmune egg. My mood and attitude toward life has become more and more positive. I feel and act like a younger and healthy man. My ambition and youthfulness remind me of when I was in my early 20's."
