NOTICE TO RESIDENTS MAIN STREET (ROUTE 29) WATER MAIN REPLACEMENT PROJECT MARCH 13, 2019

Dear Resident,

The Schwenksville Borough Authority is preparing to begin the last phase of construction of the water and sewer main replacement on Main Street.

The construction project was originally slated to be completed in the fall of 2018. Unfortunately, the original contractor defaulted on the project. The Authority Board initiated an emergency contract with utility contractor to stabilize the project before winter. The last phase of the project is currently scheduled to be completed in early spring in anticipation of an impending paving project to be completed by the Pennsylvania Department of Transportation. The Authority realizes that there is additional landscaping, sidewalk and curbing work that needs to be completed from the first phase of the project and those issues will be addressed as soon as weather permits.

The Authority will provide ongoing updates and construction schedules on its website @ www.sbawspa.org. The infrastructure improvements will provide this community with safe and more reliable water supply while reducing future operating cost for the Authority.

We appreciate your patience and cooperation throughout the construction project and we will try to minimize future inconvenience as we work to complete these upgrades.

Thank you,

The Schwenksville Borough Authority
