MANUFACTURING INGENUITY

## NAUTiLIFT

Protect your boat and elevate your waterfront lifestyle with a lift designed for ease, durability, and peace of mind. Featuring a lightweight design for simple assembly, this lift safeguards your boat while reducing stress on your dock and lift.

Proudly made in the USA and available in 6,600 lb. or 8,800 lb. capacities, it's the ultimate solution for maximizing your time on the water.

### Key Features

- Effortless assembly: Lightweight design with fewer parts for quick setup.
- Versatile options: Available for 6,600 lb. or 8,800 lb. weight capacities.
- Built for boaters: Aluminum & galvanized structural components
- Made in the USA: Engineered for quality and reliability.

## NAUTiLIFT

Each stabilizer arm offers integrated adjustment for various slip widths

Integrated hull protector pad

Each crossmember uses a solid galvanized steel tube to link the stabilizer arms, while a heavy-duty aluminum housing reinforces the connection and incorporates a t-slot design enabling easy adjustment for various bunk bracket placements

Integrated guide posts into each pitman allows for customized width adjustment accommodating various boat sizes and shapes

Our custom floats feature an integrated design with our structural framing for enhanced strength and durability while maximizing flotation
