

# PLATFORM

All Americans United Party

## PREFACE

The primary objectives of the All Americans United Party are:

1. Restore the economy
2. Eliminate crime
3. Stop illegal immigration
4. Protect the unborn
5. Prevent disastrous socialism

President Trump was a great president who achieved multitudes of important things for America and the world, in spite of having to continually fight the hoaxes and witch-hunts of the corrupt Democratic Party and the Republican RINOs (Republicans In Name Only). We believe he'll love the AAUP platform. Since it's almost certain that he'll run again in 2024, we'd like him to become the leader of our new party. If he does, we're certain that all of his supporters would follow him, making it the largest political party in the U.S., minus the RINOs. Not too long ago President Trump considered starting his own party. Perhaps the AAUP could fill that bill.

We think you'll also love the AAUP platform, but you might hesitate to join until there are a sufficient number of party members to make it a viable force in the political arena. To alleviate your concern, we've devised a solution. First, you join the party online as a tentative member, keeping your affiliation with your current party. Next, you recruit two more tentative members in one week. After that each new tentative member recruits two more in one week until the membership reaches over 67 million in 6 months, making it the largest party in the U.S., as outlined in the platform's chapter on AAUP fast growth. At that point, all of the tentative members will simultaneously switch to become AAUP full-fledged party members. So, you have nothing to lose by becoming a tentative member, but a lot to gain once we implement the policies we outline in the platform.

Every American who's concerned about his/her future, and the future of our country, should read this platform because our country is in terrible trouble. If you don't like high inflation, border invasion, rampant crime, riots, high taxes, and losing our freedom to socialism and so forth, then you should read it completely. The AAUP platform tells the blunt truth about our most important problems. Even though the 2020 election had an unusually high voter turnout of 66.8%, that still means that almost one-third of eligible voters didn't vote, indicating unacceptable complacency among far too many of our citizens who apparently take their freedom for granted. The lowest turnout at the polls was among young people, who probably aren't that interested in politics, not realizing that their uninvolvedness could ultimately cost them their freedom. All Americans should wake up, get involved and become informed to the serious threats to our democratic republic and to the world.

## INTRODUCTION

America is in serious danger. The protection of our people from military attack is the most important obligation of our federal government, especially because of the proliferation of nuclear weapons in the world. Now, we have an extremely weak president, Joe Biden, who has put us in jeopardy because of that weakness. China, Russia, and Iran have no respect for him and, as a consequence, are taking action that has diminished our standing internationally, and could even precipitate a nuclear conflagration. China is threatening to invade Taiwan, Russia has invaded Ukraine, and Iran is rushing to complete its first nuclear bomb, which puts our ally, Israel, in serious danger of an attack. In fact, China and Russia recently conducted military exercises together.

Nothing like these threats happened when Donald Trump was president because those adversaries respected his obvious strength and knew they couldn't take aggressive actions against other countries without serious consequences. We now have an inept president who has done more damage to the United States than any president in history in just a little over one year. One of his worst debacles was the failed withdrawal from Afghanistan, which caused the deaths of 13 of our heroic troops and handed the Taliban over 85 billion dollars of military arms. Had he followed President Trump's plan for withdrawal that never would've happened. Biden also left thousands of Americans, and Afghans who had helped us, behind in Kabul, and they're still there at great risk of losing their lives.

Joe Biden has blood on his hands. Since he took office, he's literally done nothing right. A recent survey showed that 20% of the people who voted for him regret that they did. He really should be impeached, but then Kamala Harris would become president, which would make things worse. Next in line for the presidency is Nancy Pelosi, which is unthinkable. Hopefully, in the 2022 midterm elections, the Democrats will lose control of both houses of Congress, and the presidency in 2024, so that we can save America.

In the meantime, our nation is in deep, deep trouble. We have multitudes of problems that threaten our safety and security, and even our very existence as a democratic republic that has been the greatest country in the history of the world. Crime and lawlessness are out of control. The murder rate has almost doubled in our Democrat controlled big cities. Rioters in those cities burned down thousands of buildings in 2020 – over 570 riots. Assaults, rapes, robberies, burglaries and thefts plague our society. Horribly, babies and little kids are being killed in drive-by shootings.

Black Lives Matter and Antifa, terrorist organizations, funded by Marxist billionaire George Soros, have attacked cities, looted small businesses, and promoted “smash-n-grab” robberies. They should be officially outlawed as terrorist organizations. Incredibly, police departments in Democrat controlled cities have been defunded, making them more dangerous for their residents. Rampant inflation, the worst in 45 years, is devaluing the dollar which seriously hurts consumer income and buying power. Gasoline prices at the pump have soared, food and household commodity prices have escalated, and lumber and building supplies have zoomed higher – 3 to 4 times for lumber. In fact, the prices on just about everything have gone way up, putting a squeeze on American families.

This economic fiasco has been caused by Joe Biden's policies, starting with the shutdown of the Keystone pipeline and cancelling fracking and drilling permits on public land, which has caused the U.S. to be dependent on foreign oil again, including Russian oil. President Trump made us energy independent for the first time in over 70 years, even selling oil to other countries. But inept Biden vindictively cancelled Trump's energy achievements on his first day as president, as well as most of Trump's other beneficial policies, which has hurt all of us.

The Mexican border is a total disaster. Biden's open border policy has caused huge amounts of dangerous, illegal drugs to flow into the U.S., which kill our people and enrich the evil drug cartels. Also, at least two million illegal immigrants from more than 150 countries have flooded into our country, many of them criminals, gang members and terrorists. A significant number of them have the China Covid-19 virus, yet are being flown and released into cities across America. The financial burden to support these illegals amounts to billions of dollars for taxpayers.

The perpetrator of all these national maladies is the Democratic Party led by Joe Biden. Its obvious primary goal isn't what's good for America, but to transform it into a socialist country, which would be an unmitigated disaster. Socialism would mean total control of our lives by big government, enormous taxes (which are already too big), and the loss of freedom as we know it. The progressive, socialist Democratic Party must be stopped. Unfortunately, the Republican Party doesn't know how, or isn't willing, to fight vigorously, partly because there are too many RINOs (Republicans In Name Only) in that party, Mitch McConnell being the worst RINO.

Hence the need for a third large party to defeat the Democrats at the polls and salvage our great country. A recent poll of all voters showed that 70% of them want a third large party because they are disgusted with the status quo and the "deep state." Our new party, the All Americans United Party (AAUP), has a platform that really will make America great again, following in President Trump's footsteps. The AAUP is a conservative party based on the conservative values upon which the Founding Fathers formed our great republic – God, country and family. Now, there's not much sense in starting or joining a new political party that has no chance of success because it has too few members and little chance of fast growth. However, we've devised a plan to make the AAUP the largest party in the U.S. in just 26 weeks.

Basically, the plan is quite simple – it's a doubling process. If each person who joins the party recruits two other people within a week, in 26 weeks the AAUP would become the largest party – bigger than either the Democrat or Republican parties. No one needs to recruit more than two people, unless they want to.

So, starting with just one party member, and that one member recruits two more new members, and those two bring in four, and those four bring in eight, and that doubling process continues 26 times in 26 weeks, the AAUP will become the largest political party with over 67 million members. Then the AAUP will select excellent, patriotic candidates to run for offices in all levels of government – federal, state, county, and city – to enact the AAUP platform and policies to serve the American people and reverse the disaster we now have that Joe Biden has caused.

We believe the beneficial AAUP platform will be readily accepted by the great majority of Americans who will then join us to save our great country before it's too late. We believe our platform is superior to the Democrat and Republican platforms, and addresses many critical issues that theirs fail to consider. It's not important that you agree with every one of the AAUP's propositions, which would probably be the case with all party platforms. But if you recognize the overall importance of our platform, then you should join with us in this patriotic effort to make America great once again. The AAUP knows how to fight and has a plan to vigorously fight the nefarious Socialist/Marxist Democrats before they totally ruin our country.

## AAUP FAST GROWTH

As mentioned in the Introduction, here's the plan, in more detail, to make the AAUP the largest political party in the U.S. quickly. We know how attractive our platform will be for the majority of Americans who will recognize the great benefits for themselves and for America. So, starting with just one member, and that member recruits 2 new members in one week, and those 2 new members recruit 2 new members each in one week, etc. etc., and that development continues for 26 weeks, the AAUP will become the largest political party in the U.S. by far with over 67 million members.

Basically, this is a doubling process, like multi-level marketing, except without any money payments. Once again, a new member needs to recruit only 2 other members, unless he or she wants to recruit more. The AAUP isn't starting with just one member – we have many, many people ready to join, which will expedite growth.

Here's a chart showing the growth week by week for 26 weeks.

| No. of Members | Week |
|----------------|------|
| 1              |      |
| 2              | 1    |
| 4              | 2    |
| 8              | 3    |
| 16             | 4    |
| 32             | 5    |
| 64             | 6    |
| 128            | 7    |
| 256            | 8    |
| 512            | 9    |
| 1,024          | 10   |
| 2,048          | 11   |
| 4,096          | 12   |
| 8,192          | 13   |
| 16,384         | 14   |
| 32,768         | 15   |
| 65,536         | 16   |
| 131,072        | 17   |
| 262,144        | 18   |
| 524,288        | 19   |
| 1,048,576      | 20   |
| 2,097,152      | 21   |
| 4,194,304      | 22   |
| 8,388,608      | 23   |
| 16,777,216     | 24   |
| 33,554,432     | 25   |
| 67,108,864     | 26   |

So, in just 6 months the AAUP would become the largest political party and really do good for the American people.

One last thing – when a member recruits 2 new members, they should stay in contact with them to urge them to recruit 2 more each.

Please don't confuse this doubling method of growth with multi-level marketing. The AAUP doesn't sell products and no money changes hands. In fact, we don't even accept donations (eventually we might to cover operating cost).

## THE ECONOMY

For 4 years while Donald Trump was president the U.S. economy was very strong until the China virus, COVID, invaded our populace. But even then we were doing okay – gas and commodity prices were low, inflation was low and stable, unemployment was low, regulations on small businesses were greatly reduced and the Gross Domestic Product (GDP) was high. Then Joe Biden and his cohorts stole the presidency and cancelled Trump's achievements, which sent the U.S. into a tailspin. On his first day in office, Biden shut down the Keystone oil pipeline, halted drilling and fracking for oil on government land, which caused the price of gas at the pumps to double and triple, and commodity prices to zoom higher.

The resulting high inflation has outstripped any increase in wages. Biden's ridiculous policies have also caused a supply line crisis – shelves in stores are half empty or worse. He's blamed our economic catastrophe on Putin's invasion of Ukraine, which is total nonsense. All of these problems started well before that war, which he caused because of his weakness. Joe Biden's record shows that he hasn't done anything right in the 50 years that he's been a politician. In fact, he's done more harm to America than any president in history.

Now he's put us on the road to a recession. Once the progressive, socialist Democrats are booted out of office, we must employ every possible means to rebuild our economy quickly. Reopening the Keystone pipeline, resuming oil drilling and fracking, and building more safe nuclear power plants is imperative. Also, we should eliminate the huge bureaucratic waste of billions of taxpayer dollars at every government level – federal, state, county and city. There are overlapping city and county governments across the U.S. To save money, the AAUP proposes to either consolidate them or eliminate the one that is unnecessary.

Small businesses, in particular, are overburdened with costly city and county regulations that are strictly enforced – excessive inspections and permits, sign permits, unnecessary architects fees, ridiculous restrictive building regulations, etc. Most of them should be cancelled to facilitate the success of small businesses. In many cases big companies get waivers to avoid these regulations that small entrepreneurs must endure. That is patently unfair. We should be favoring small business because it produces about 80% of the revenues in the U.S. The excessive number of government employees that enforce and process needless regulations should be reduced which would save money for both businesses and taxpayers.

Corporate tax rates should be lowered to compete with other countries, which would also create expansion and more jobs. Corporations that have moved offshore to make more money, which caused the loss of a large number of jobs, should be forced to return to the U.S. by employing tariffs, taxes, and federally enacted regulations. Corporations that outsource their product orders to other countries shouldn't qualify for government contracts. Big corporation CEO's salaries are exorbitantly high. Their counterparts in other countries make a lot less – half or even lower. A recent report from the Standard & Poor's 500 companies showed that the average salary of their CEOs was 13.1 million dollars annually compared to \$37,632 for the average worker in non – supervisory roles.

So, the CEOs make about 351 times what the workers make. That is outrageous greed. A survey showed that 74% of the public think that CEO salaries are way too high, and 63% say there should be a cap on their pay. Naturally its vitally important that big companies attract the best and the brightest to fill those positions, but we think they would be filled adequately with smaller salaries. The AAUP will authorize a study to assess the income disparity, find a solution, and enact legislation accordingly. The money saved by reducing exorbitant salaries should be passed on to consumers with lower prices. The AAUP believes that these policies will undo the damage that senile Joe Biden has done to America's economy.

## ILLEGAL IMMIGRATION

The AAUP supports legal immigration based on merit, but totally rejects illegal immigration. There are now 7,000 illegals entering the U.S. daily, but if Title 42 is eliminated, which senile Joe Biden might do, the influx is expected to rise to 17,000 daily, which is mind boggling. Biden is actually committing a serious crime by violating the Constitution which requires him to protect our country. The annual cost to the taxpayer to give food, housing, medical care, etc., to illegals is 143.1 billion dollars. The best and the brightest aren't illegally sneaking across our southern border. They apply for entry and their backgrounds are investigated.

The U.S. should give preference of entry to those applicants who will benefit our country the most. The AAUP supports finishing the Trump border wall, increasing the number of border protection personnel, and renew Donald Trump's policy to "remain in Mexico," until no illegals can enter. In April 2022 when Alejandro Mayorkas, the Secretary of Homeland Security, appeared before a House Judiciary Committee, he stated that the Biden administration had inherited a "border mess" from Donald Trump. That was a totally disingenuous lie from a crazy, incompetent Democrat that should resign. In fact, Trump's border policy brought illegal entry down to a trickle. Currently we have an inept, foolish president, Joe Biden, who has ridiculously invited illegal immigrants en masse into the U.S. Instead of finishing President Trump's border wall to protect all of us, he's left it open, making it easy to enter.

Of course, he's done this because he assumes that these illegals will ultimately become voters in the Democratic Party. He doesn't really care about the negative consequences of his actions. Also, it isn't fair that illegals are allowed to enter the country at will when people who've applied for legal entry have to wait for years for approval. Very few of the people crossing our border qualify for asylum. Legitimate asylum requests must show that the applicant fled his/her country because of imminent serious threat to life.

The great majority of people coming in illegally are basically trying to better their lives. The average age is between 15 and 17. Coyotes, who bring them across the border, typically charge \$5,000 to \$10,000 per person. Films of the illegals show that most of them are very well dressed. Most of them are young, healthy males. It doesn't appear that these people are fleeing from great danger or threat to life. While we sympathize with their desire for a better life, wholesale illegal immigration will seriously damage our country in many ways.

First, there are some very dangerous people entering – MS13 gang members, Middle East terrorists, drug dealers, felons, and people with diseases, including the China virus. Even though these illegals aren't being vetted or tested for the virus, they're being moved and settled into cities across the U.S. Joe Biden is giving everyone of the illegals entering the country a free smart phone, at taxpayers expense, supposedly as a way of tracking them. That is just plain crazy. Are you angry yet? The cost to the American taxpayer is enormous because there are approximately two million illegals from 150 countries entering annually. Illegal drugs, like fentanyl & methamphetamines, are flowing across the border killing 100,000 of our citizens every year and making billions of dollars for the cartels. The overall damage to our country from Biden's border policy is incalculable.

The bottom line is that the U.S. has immigration laws on the books that must be rigidly enforced. Also, the illegal immigrants that are already here should not receive any government benefits, which are a misuse of taxpayer dollars. The Democrats give them total subsistence, including education for their children, but that is wrong. That only encourages more illegals to enter. Even legal immigrants have to show proof of funds to support themselves, so they don't become a burden on our economy.

## CRIME

Joe Biden's policies have fueled a crime wave in America. We must get tough on criminals as never before to reverse the crime epidemic across the country. Murders, assaults, rapes, robberies, and drug proliferation are out of control, especially in big cities run by Democrats. In 2020 many of our cities were attacked by thugs who burned down thousands of buildings, destroyed businesses owned by hardworking Americans, murdered people, and caused enormous violence and chaos. Black Lives Matter and Antifa, funded by the evil Marxist billionaire, George Soros, were heavily involved in those riots and should be designated as terrorist organizations. Very few of those thugs have been prosecuted because of Democrat, progressive, socialist prosecutors and judges who've been installed in their offices with money also funded by Soros, who's trying to transform America into socialism.

New York City, Chicago, Portland, Minneapolis, Austin and 15 other major cities have stupidly defunded the police, which has caused a huge escalation in crime. The mayor of New York City, Eric Adams, recently called white cops "crackers." What the hell is a racist idiot like him doing in public office? Since inept Joe Biden became president, crime in Democrat controlled large cities has risen between 50% and 100%. To make matters worse, the Democrats have decreed "no cash bail" and "catch and release" laws which encourage thugs to commit crimes because of little consequences. New York City recently loosened its laws to prevent police from arresting someone if they resist, unless they're holding a weapon. That is beyond crazy. No wonder people are leaving the city in droves.

Also, the Democrats run "sanctuary cities" that protect criminals and illegal aliens from arrest – again, beyond crazy. Liberal Democrat judges give light sentences or probation to criminals that have committed serious crimes. Parole boards are releasing murderers from prison way too early. As a result of all of this nonsense, criminals have become very bold, breaking en masse into stores across the country and stealing the merchandise – "snatch and grab." Unfortunately, there aren't enough police to stop this mayhem.

Another big problem is gangs – street gangs, motor cycle gangs, prison gangs, etc. The ruthless, violent gangs make millions of dollars from their criminal activities, especially the sale of illegal drugs in the inner cities. They don't hesitate to kill people who challenge them or get in their way. A large, ruthless, brutal gang, MS13, has a motto – "rape, kill and control." There are 33,000 gangs in the U.S. and, with rare exception, they're involved in crime of one kind or another. These thugs have made our country unsafe for law-abiding citizens. Gangs should be outlawed.

There have been over 200 mass killings in the U.S. in the first five months of 2022 and 693 in 2021. Thirty of them happened in schools. Since 2018 there has been a total of 119 school shootings. Obviously not enough has been done to prevent these tragedies. The AAUP intends to enact legislation to super fortify all schools to protect America's most precious assets - our children.

We must stop this crime epidemic by hiring many more police, even doubling or tripling police departments size, instead of defunding them, which the crazy Democrats advocate to advance their plan to take America into socialism. Their cohorts, the lame stream media, CNN, MSNBC, ABC, CBS, New York Times, etc., focuses on reporting unarmed blacks killed by cops to foment racial division. However, only 6 unarmed blacks were killed by cops in 2021 (justified shootings), but 10,000 blacks were killed by other blacks which the Democrats and their corrupt media neglected to report. That doesn't help the black population. Judges who are soft on criminals should be impeached to remove them from the bench. Legislation should be enacted to eliminate the "no cash bail" and "stop and release" policies, but support the "stop and frisk" policy, which would be used only when there's reasonable suspicion of a crime. The AAUP pledges to pursue whatever means are necessary to stop the enormous amount of crime that has made America a dangerous place to live.

The killing of 19 elementary school children and two teachers in Uvalde, Texas, was a monumental tragedy. There have been 30 school shootings by the end of May 2022, and a total 119 since 2018. Our precious children are obviously at great risk. The AAUP believes it's a priority to fortify all schools from attacks. Legislation should require that all school doors are securely locked, an armed guard stationed at a single entry secured with metal detectors, and volunteer teachers given firearms after being properly trained.

The root cause of the crime wave in America is the serious decline of morality, culture and civility. We're living in a spiritual vacuum in our country – a loss of faith, and a breakdown of family and community. This is exacerbated by the poverty in the Democrat controlled big cities – especially in their ghettos.

It's not rich people who commit violent crimes, join gangs and break into stores; it's typically young people from the inner-city ghettos and barrios. They turn to crime because they're frustrated with their lot in life and lack of opportunity. In the long run, if we are going to solve the serious crime problem, we must help the minorities in the ghettos and barrios with economic opportunities. President Trump did just that with his "Neighborhood Opportunity Program," which was a good start, but we need to do much more. President Trump probably would've created more beneficial programs for minorities, but a fraudulent election prevented that from happening. The AAUP would assume his mantle and enact legislation accordingly.

## RIOTS

The great majority of our citizens are fed up to the eyeballs with riots in American cities that have caused so much death and destruction. People are afraid to visit tourist cities like San Francisco, New York City and Chicago. Antifa, Black Lives Matter and paid operatives that travel from state to state (making them subject to federal law) have caused 570 riots. Buildings with small business tenants worth billions of dollars were destroyed, wiping out incomes, investments and owners' life savings. Those riots were all in cities run by Democrats who ridiculously called them protests. The TV reporters from the lame stream media, CNN, MSNBC, ABC and CBS, called them peaceful protests while, behind them, huge fires were burning down multistory buildings.

The Trump followers were involved in one riot, more like a protest, at the Capitol Building on January 6, 2021, but no buildings were torched, there was minimum destruction and no one was killed by them. In fact, the protestors were escorted through the barrier fence and into the Capitol by guards, which was caught on camera. But there was one death, Ashli Babbitt, a military veteran, who was shot by a Capitol police officer as she was climbing through a window with other protesters. That terrible, unprovoked shooting was by an officer who has never been charged with a crime, which is a miscarriage of justice.

All of the lame stream, socialist media have branded that protest as an insurrection to overthrow the federal government. That's a lot of hokum. The protesters never fired a shot because they weren't carrying guns, so that couldn't have been an insurrection. Yet the progressive, socialist Democrats arrested 725 protestors and have held them in deplorable conditions in jail for over 15 months. The Constitution guarantees the right of a speedy trial, but that apparently doesn't apply to opponents of the Democratic Party. The rabid Democrats have been investigating President Trump for starting the incident, even though he told the crowd, at the end of his rally, to walk "peacefully and patriotically" to the Capitol.

Their investigation is beyond ridiculous because those same Democrats did nothing to stop the horrible riots in the big cities they controlled. There were 16,000 rioters arrested in those cities but 93% of them, who had burned down buildings, had the charges dropped by radical, progressive judges and prosecutors, while only 1 of the 725 Capitol protesters was released. In fact, the Democrats and their fake news media tried to justify the real riots that their own policies caused.

In any case riots in America shouldn't be allowed. When a riot starts anywhere, the National Guard should be deployed immediately to stop it fast and arrest the thugs who cause mayhem and murder. The AAUP will enact a federal law to give the president the power to do that. President Trump tried to do that during the 2020 riots, but stupid governors and mayors thwarted him.

## DRUGS

Illegal drugs are the scourge of our nation. More than four times as many people in the U.S. died from drug overdose than were homicide victims in January 2021. There are about 100,000 overdose deaths annually. That is a tragedy. 53 million people aged 12 and over used illegal drugs, including misused prescription drugs, in the last year. Opioids, like fentanyl, are the main choice of users who absorb hard drugs. Of course, more people use marijuana than anything else. Our population has been brainwashed over decades to believe that “pot” is harmless. That just isn’t true. It’s ten to twenty times stronger than it was decades ago. It’s a mind-altering drug that has many negative effects.

Contrary to what you’ve been led to believe, “pot” is also a gateway drug to cocaine, heroin, and fentanyl, among others. Some states have legalized it, to the detriment of their residents. The main reason for legalization is financial – there are huge profits made from growing and selling “pot”, as well as much more state tax revenues. At the same time, users in the U.S. are making the drug cartels filthy rich. All of this harmful nonsense must stop. The AAUP proposes to halt the flow of illegal drugs across our southern border by completing the fence that President Trump started, and then superman the border with the Border Patrol to catch cartel thugs, as well as illegal aliens.

We would even advise that the National Guard, and/or army troops, be employed to catch all offenders. Those that are caught should be given severe, mandatory prison sentences to discourage others from violating our laws. The same prison sentences should be applied to illegal drug makers and major distributors in our country. That would save millions of lives in the long run because crime and mental illness would be greatly reduced. The money saved across the board would be enormous and our young people, especially, would be salvaged.

## DEATH PENALTY

Murder is generally a state crime, tried in a state court, not federal court, with some exceptions. Some states have the death penalty, like Texas and Florida, and others do not. This doesn't seem fair. Someone who commits the heinous crime of murder in one state is put to death, but in another state may get a 25-year prison sentence and be out on parole in 15 years. For such a severe crime, the penalty should be the same regardless in which state the crime occurs. The AAUP proposes to enact a federal law to address this inequality.

We support a mandatory death penalty for certain crimes: (1) Murder of a child under age of 13, (2) Serial murders, (3) Mass killings, and (4) Abduction and rape of a child under the age of 8. Of course the truly criminally insane would not be subject to the death penalty, but would be incarcerated for life. Another reason to have the same penalties in all states, not only for murder, but also for other very serious crimes, would be to discourage criminals from gravitating to those states with the most lenient penalties, which is detrimental to the people living in those states. The federal government cannot, and should not, interfere with states' rights, but when the most important issue of penalties for the worst crimes is considered, there should be consistency across the U.S. Of course, the best way to standardize penalties would be for the AAUP to sweep all of the elections for state offices in a general election, enabling it to coordinate the laws. Considering the desirability of the AAUP platform, that could happen.

## SOCIALISM

Joe Biden, Kamala Harris, Nancy Pelosi, Chuck Schumer, Jerry Nadler, Alexandria Ocasio-Cortez, Ilhan Omar, Rashida Talib, and other radical, leftist Democrats are hell bent on transforming America into a socialist country. That would be an unmitigated disaster. Socialism is akin to communism. It doesn't work and it never has. It forces a redistribution of wealth that reduces people to being subjects of the government which controls every aspect of their lives. In essence freedom disappears. Cuba and Venezuela are good examples of socialist debacles.

When Cubans demonstrate against over 60 years of loss of freedom, they're arrested, prosecuted and suffer long prison sentences. In 1999 Venezuela turned socialist and has been declining since then. Today, food and medicine are scarce – people are reduced to eating from garbage cans. From being the top economy in South America before 1999, it has now become the worst. Socialism means huge government, exorbitant taxes, massive regulations and restrictive controls of business, industry and religion. It destroys individual initiative and the desire to succeed through hard work, because whatever you attain will be taken from you by the government.

With democracy and capitalism, you share the wealth. With socialism you share the poverty and misery. Some people say that Sweden, Denmark and Norway are examples of successful, socialist countries, but that is wrong. In fact, they are highly capitalistic with fairly high taxes to give their citizens more social programs. Communist China is a paradox. On the one hand you have a capitalist economy, and on the other hand you have a very repressive, dictatorial, brutal regime.

Of course, the U.S. has largely contributed to the economic success of China by having our goods manufactured there, probably a big mistake. It's unfortunate that China has a communist regime, because if it was a Democratic, capitalist country, it would be a great ally. Today most of our younger generation is leaning towards socialism. This isn't surprising considering our kids are being taught about socialism from first grade through college by leftist, progressive teachers. There should be legislation to stop them from brainwashing young, impressionable minds with their nonsense that attacks our democratic, capitalist system that made the U.S. the number one superpower in the world.

These so-called teachers should be fired for teaching socialism and replaced with instructors who will teach the students to take pride in America, its history and accomplishments. This terrible problem is compounded by the support of the leftist, progressive media like CNN, MSNBC, The New York Times, and many others, which are the tools of the socialist Democratic Party. Their reporting, replete with lies, distortions, and omissions, is biased and dishonest. They really are the "fake news." God created people with an innate desire for improvement. As a result, mankind has risen from living in caves to enjoying the fruits of continual progress through improvement and achievement. Freedom has been part and parcel of that progress. We must not allow that freedom to be negated and the fruits of our labor to be confiscated and redistributed by socialists who are far too pervasive in our government and country.

## RACISM

America is definitely not a racist country. Black Lives Matter is a fraudulent organization founded by three avowed Communist women that have ripped off their donors. They've accrued 90 million dollars from gullible people and "woke" corporations under the guise of fighting racism. Only 20 million dollars was funded by BLM to fight racism, leaving 70 million dollars unaccounted for. But much of that was spent by the founders to buy expensive cars and mansions – one in Los Angeles for 6 million dollars. Systemic racism is a fantasy promoted by the lying Democratic Party to divide the country and garner the black and Hispanic votes. The Democrats have literally weaponized racism as a tool to achieve their nefarious political ambitions. Unfortunately, the majority of the blacks and Hispanics belong to the Democratic Party because they've been propagandized by the Democrats and the extreme left wing, socialist media which they control, like CNN and MSNBC. The minorities, and people in general, don't know enough of the history of racism in the U.S. If they did, they'd leave the Democratic Party in droves.

First, the slavery that started in 1619 was confined to the south's plantations. From 1828, when the Democratic Party was founded, the slave plantations were all owned by Democrats, who made huge profits with the free labor that planted and harvested mainly cotton crops. The first Republican president, Abraham Lincoln, was anti-slavery, as was most all of the Republican North. When Lincoln was elected, the southern states seceded, attacked Fort Sumter, and started the Civil War, which lasted from 1861 to 1865. During the war, in 1863, Lincoln freed the slaves with his "Emancipation Proclamation." So, the Republicans fought the Democrats to free the slaves at a cost of about 750,000 soldiers' lives.

When the war ended some extremist Democrats formed the Ku Klux Klan which murdered many blacks in the south for decades. Also, in 1865, the Democratic southern state legislatures enacted "Black Codes" and "Jim Crow" laws to restrict blacks and maintain their plantation system. The United States Republican Congress responded by passing the 13<sup>th</sup>, 14<sup>th</sup>, and 15<sup>th</sup> Constitutional Amendments, which abolished slavery, gave blacks equal protection under the law, and the right of black males to vote. Even after that the Democrat south applied racial segregation until the Civil Rights Acts of 1964 and 1990. Today the Democrats need the minority votes to win elections. The crime ridden ghettos and barrios are in Democrat run cities and states.

They get the majority of the minority votes by keeping them dependent by giving them welfare money, enough for subsistence, but insufficient to improve their lives and escape the ghettos and barrios. The Democrats also keep the minorities hamstrung with inferior schools where substandard teachers can't be terminated because of tenure. The party is vociferously against school choice because that would allow minority parents to send their kids to better schools to get better educations. Since a good education will promote success and independence, it could jeopardize the Democrats control of minorities who would no longer need their welfare money, which would cause a subsequent loss of their votes. Basically, the minorities are the victims of the Democrats, whose quest for power is insatiable, no matter what great harm they do. (For an enlightening history of slavery and racism, read Dinesh D'Souza's book "Death of a Nation", which every minority person should read to get the truth.)

Now we have an incompetent president, Joe Biden, that foments racism and has a fifty year history of racism and racist statements, who was mentored by the Ku Klux Klan former Grand Wizard, Robert Byrd, who was a senator for 51 years. Biden refused to allow his kids to be bussed to a ghetto school, saying that he didn't want them to be raised in a "racial jungle." During the 2020 presidential campaign he responded to a question from a black man by saying, "If you don't vote for me, you ain't black." Another comment to a black man was to ask him if he was a "junkie." As an Oakland, California district attorney, Vice President Kamala Harris put thousands of blacks in prison for minor drug offenses. Biden and his administration aren't trying to help our minority citizens – they're trying to divide America by fomenting racism for political reasons.

President Trump did great things for the minorities with his "Neighborhood Opportunity" program and his prison programs – the "First Step" and "Second Chance" programs. The AAUP will promote more of those efforts to help the blacks and Hispanics, starting with free choice of schools. In reality America doesn't have a racist problem, other than the one foisted on us by the Democrats. We believe that the overwhelming majority of Americans are skin color – blind. After all, the white majority elected a black president twice. (The irony is that Obama, a Democrat, did little or nothing for the black community in eight years in office, even for the people in his home town – Chicago).

We've had two black Supreme Court justices – Thurgood Marshall and Clarence Thomas. Blacks dominate sports, thrive in music, movies, TV shows and ads, in politics and government, and as business owners and entrepreneurs.

The Democrats would have us believe that all white people are "white supremacists" and should carry guilt for the historic slavery which their party clings to. That's just another concoction they've created to further divide the country for their underhanded, evil political purposes. The great majority of white people have no connection whatsoever to the slavery of 150 to 200 years ago. After all, the U.S. population at the time of the Civil War was 33 1/2 million. Today our population is 330 million. Most of the people in our country are descendants of people who immigrated to America long after that war ended, so obviously they bear no guilt for the Democrats slavery. In any case, it's illogical that even those who are descendants of the 33 1/2 million should be at all responsible for something that happened long, long ago. That's just a lot of nonsense dispersed by the corrupt Democratic Party, along with "woke culture," "cancel culture," "critical race theory," "political correctness," and "gender identity."

The Democrats have lost their collective minds. So, there's no doubt that the Democratic Party is now, and always has been, the party of racism. Even though the minorities have been deceived by the Democrats, they're beginning to see they've been hoodwinked as shown by the 2020 election, wherein the Hispanic vote almost doubled for Trump, and the black vote for him rose considerably. Once the minorities realize the evil things the Democrats have done to them, they'll reject the Democratic Party en toto, as they should, for their own good.

## FOREIGN AFFAIRS

The AAUP's position on foreign affairs is clear and simple – America first. President Trump was absolutely right to put America's interests first. There's not a nation in the world that does otherwise. That doesn't mean that we disregard other countries interests and needs. In fact, America has been extremely generous with other nations – perhaps even too generous. It's most important that we retain our status as number one in the world because we've been the promoter and bastion of freedom and democracy.

Currently it's vitally important that we keep ahead of China since it's tightly governed by an evil, totalitarian Communist regime that has little respect for human life, and is on a path of expansion and exploitation in an effort to dominate the entire world. Of course, our stupid politicians have caused this catastrophe by allowing our big corporations to give our industry, jobs and our money to China so they could make huge profits due to cheap Chinese labor. President Trump started to equalize trade with China by applying tariffs and sanctions. Like Teddy Roosevelt, Donald Trump talked softly (sometimes loudly) and carried a big stick.

China and other rogue nations didn't mess with him by attacking other countries. He had great international success, including the very important Abraham Accord which normalized relations between Israel and the United Arab Emirates and Bahrain, with Morocco and Sudan joining shortly after. Trump's policies defeated ISIS, kept us out of foreign wars, and much more. He rightfully cancelled the agreement with Iran to curtail its nuclear weapons program and placed sanctions on its economy.

Now inept Joe Biden has put the U.S. in jeopardy by cancelling President Trump's great achievements, more in four years than any president ever. Because of slow Joe's policies, Iran will most likely develop a nuclear weapon which will put Israel and the entire Middle East in danger. Trump made North Korea stop testing missiles. Now, Kim Jong Un has resumed testing because he sees Biden's weakness. Russia has invaded Ukraine, which they never would've done if Trump was still in office – so says 62% of the voters.

China is threatening Taiwan, illegally expanding in the North and South China Seas, and stifling democracy in Hong Kong. Biden is doing little to counter these aggressions even though they were caused by his weakness. In fact, he and his profligate son, Hunter, have greatly economically benefited from their dealings with the Chinese Communist Party; it's likely that he has compromised his ability to effectively deal with them. The AAUP pledges that it will follow President Trump's lead in foreign affairs because his policies were the best for America and for the world.

## DEMOCRATS AND REPUBLICANS

There are over 67 political parties in the U.S., but the only two of real significance are the Democrat & Republican parties. The Democrat party has changed over the decades and is now the party of the elite rich and powerful, Wall Street, big banks, big corporations and the Hollywood rich and famous. Approximately two thirds of their financial support in the 2020 fraudulent election went to senile Joe Biden, and only one-third to Donald Trump. The Democratic party under Joe Biden has swung so far to the left that it has basically become socialist, and socialism doesn't work. The Republican party is the preferred choice, but even the Republicans leave much to be desired.

First, there's too many RINOs (Republican in Name Only) in the party, like Mitch McConnell – career politicians whose most important goal is to remain in office. Next the Republicans don't know how to fight back vigorously when attacked with the Democrats incessant lies. Unfortunately, the average Democrat voter has become a dupe and a victim of the lies of the mainstream, socialist media like CNN, MSNBC, ABC, CBS, the New York Times, and others, which aid and abet the lying, socialist Democrats that are inflicting so much damage to our country. What's wrong with these people? Don't they realize they're jeopardizing America's future as a democratic republic as it slides towards socialism? Venezuela had the top economy in South America until it slid into socialism under Nicolas Maduro. Now the people are eating from garbage cans. We must not let that happen to America.

The AAUP platform will ensure that Americans will continue to be the greatest country in the history of the world. Our party has devised new, innovative ways to expose and counter the lies that Democrats continually disseminate. Those countermeasures include ways to inform the ghetto residents to the incredible harm that the Democrats have done to them which has kept them in penury in their neighborhoods. When they realize what the Democrats have done to them, we believe they'll turn against them, unite in force to overthrow their dominance, and join a party that will truly help them – the AAUP. Then blue states like California, New York & Illinois will become conservative.

## 2020 ELECTION

There's no doubt that the 2020 election was rife with fraud – ballot harvesting, no signature verification, dead peoples' ballots, out of state ballots, ballots from non-existent addresses, lost drop boxes, more ballots than were residents in some areas, etc. It was an improperly supervised mess. On TV we saw films of hidden ballots for Biden being uncovered and run through vote counting machines 4 times. The evidence of fraud was overwhelming. Unfortunately, the leftist, progressive prosecutors and judges refused to investigate the election, including the Supreme Court, which was a terrible mistake. Elections definitely have consequences.

Now the whole country is suffering from the egregious mistakes of a totally incompetent president. The AAUP will propose to renew election fairness and integrity to honor the choices of the American voters in all future elections. If the 2020 election had been fair, Donald Trump would still be president and we wouldn't be in the mess Joe Biden has caused.

## VOTING

America's electoral process is in a shambles. The 2020 presidential election was a total disaster. Filling out a ballot at a polling place on a given day has historically been the customary way of voting. The exception was mail-in voting, which has a long history dating back to the Civil War. Soldiers were allowed to vote by mail because they were battling in remote locations. Eventually more mail-ins were allowed for voters who couldn't get to the polls – travelers, railroad personnel on the move, sick people, etc.

But today the privilege has broadened to include just about anyone, and that's dangerous because those ballots are accepted without absolute identification. To make the matter worse, people can now vote by dropping off their ballots in "drop boxes" at various locations. Further complicating the process, people can go door to door to induce voters to choose a particular candidate, and even fill in their ballots – "ballot harvesting" – which is illegal, but the Democrats do it anyway. Money could be given to the voter by the harvester to induce cooperation.

Early voting is another problem. In many states early voting starts 30 – 60 days before an election. That's very bad because critical information about a candidate might surface after the voter voted early, that could've caused a different choice, such as the Hunter Biden "laptop from hell." Therefore, early voting should be eliminated. In future elections the following regulations should be employed: (1) Mail-in ballots only from military off shore and travelers visiting abroad, (2) No drop boxes (3) In person voting with valid photo I.D. (4) Only one designated day to vote at a polling place (5) No ballot harvesting (6) Monitors from the two largest parties when votes are counted to prevent multiple counting of the same ballots, (7) If a mail-in ballot is received late it won't be counted. If a citizen votes offshore with a mail-in ballot, a copy of a photo I.D. and an affidavit attesting to the identity must accompany the ballot. If someone in the military offshore mails in a ballot, a verification of the voter's identity by the commanding officer should be submitted.

The Democrats protest that requiring a photo I.D. is discrimination. They're just fomenting racism again. They're basically saying that minority voters aren't capable of getting a photo I.D., which is a lot of nonsense. The Democrats objection is demeaning to minorities, which is no surprise because the Democratic Party has always been racist.

We must have free and fair elections, otherwise we don't have a country. There's already too much division and strife in America. We must not compound it with rigged, fraudulent elections, as we had in 2020, for which there's much evidence. The AAUP will enact voter regulations that include the aforesaid requirements.

## DONALD TRUMP

Donald Trump shocked the Democrats when he unexpectedly won the 2016 presidential election. All of the leftist pundits had predicted that Hillary Clinton would win easily. After Trump won, the Democrats shock turned into extreme hatred which came to be known as “Trump Derangement Syndrome.” They also hated him for his refreshing bluntness. He never minced words during the campaign or as president. He always candidly said what was on his mind, even calling people names. He answered questions directly without notes or evasion, which was a sharp contrast to most politicians who speak with forked tongues and give nebulous answers.

The socialist Democrats, supported by their fake news media CNN, MSNBC, etc., attacked Trump relentlessly for 4 years with specious lies they created, like the Russia hoax. But despite all the phony attacks, President Trump achieved great things for America. He is a true patriot. For the sake of our country, he left a luxurious lifestyle, and without political experience, took on the hardest job in the world, the U.S. presidency. He didn’t do that for self-aggrandizement or financial gain. He did it because he was fearful for America’s future after 8 years of failed Democrat policies under Barack Obama.

In fact, he lost money while in office. Contrarily, Joe Biden and his son, Hunter, got filthy rich because of their nefarious deals with Communist China, Russia and Ukraine. The Democrats and the fake, socialist news still won’t acknowledge President Trump’s great accomplishments for America. In fact, with revenge, Joe Biden has cancelled almost all of the marvelous things he did, which has hurt us badly – inflation, open borders, supply line shortages, Russia – Ukraine war, etc.

The Democrats extreme, irrational hatred of Trump caused the crooked election of an inept president, Joe Biden, who has led us into an economic disaster. Donald Trump did more positive things for America than any president in history. Amazingly he did that while losing lots of time defending incessant, spurious attacks from the lying Democrats and their fake news. The AAUP hopes that Donald Trump will run for president again to make America great once more, so we don’t descend into socialism and become another Venezuela.

## **TERM LIMITS – CONGRESS**

Members of Congress should have term limits. Too many long-term, career politicians have gotten very rich while serving in Congress for extended periods of time. The means by which many of them attained their riches is open to question. Over the years many others committed crimes, served time in prison, and were forced from office. The president of the U.S. can serve only 2 four-year terms, so why should members of Congress serve indefinitely? It makes no sense whatsoever.

Serving for extensive terms invites corruption from influence peddlers with money in their pockets. Currently the term for a senator is 6 years with unlimited re-elections. The AAUP proposes legislation that will limit a senator to 2 terms, for a total of 12 years. Members of the House of Representatives are elected for 2 years, with unlimited re-elections. The AAUP proposes a limit of 5 re-elections for a total of 12 years. The AAUP also proposes that retirement and other benefits will be commensurate with those in the private marketplace. America needs patriots who want to serve our country, not for power and money from many years in office, but to do the will of the people.

## **PACKING THE SUPREME COURT**

Packing the Supreme Court with an unlimited amount of judges would be terribly wrong and harmful to our country. Currently there are more conservative judges on the court than liberal ones. But an extremely liberal Congress and President, like Joe Biden, could appoint more judges until the Court swings to the liberal side. Then a successive conservative Congress and President could appoint more conservative judges to swing the court again. If this continued, we could end up with a thousand judges. Of course, that would be ridiculous.

It's too bad that the judges can't be totally impartial politically, but they're fallible human beings, like all of us. The only way to stop the packing of the Supreme Court would be with an Amendment to the Constitution, and that requires a two-thirds vote in both houses of Congress, and that's very difficult to accomplish. However, if either party does pack the Court, it should be loudly and roundly condemned, and the party also taken to task. The way to avoid such a catastrophe would be to elect AAUP candidates to Congress in sufficient numbers to enact a Constitutional Amendment to keep the Supreme Court at nine seats permanently.

## **RUSSIA – UKRAINE WAR**

There's no doubt Joe Biden's weakness caused the Russian-Ukraine war. Had Donald Trump not been cheated out of re-election, he'd still be the President and Putin wouldn't have invaded Ukraine because he respected his strength. Therefore inept Joe has blood on his hands again – the innocent children, women, men and soldiers that have been slaughtered in Ukraine. To make matters worse, he hasn't acted fast enough to supply Ukraine with the armaments they need so badly to conquer the Russians. Due to Biden's ignorance the U.S. is now spending a billion dollars daily to buy oil from Russia, which finances Putin's war. That wouldn't be necessary if stupid Joe hadn't cancelled the Keystone Pipeline and stopped oil drilling and fracking on government land on his first day in office.

Biden blames the horrible inflation that our citizens suffer on the war, which is absolute nonsense. Inflation had risen to 7% before the war even started. Joe Biden is a total liar and always has been. Now we're closer to a nuclear war than at anytime since the Cuban Missile Crisis in 1962. He's a serious danger to our country and the worst president in American history. Hopefully the dyed-in-the-wool Democrats who voted for him will finally see the light and stop supporting this fool and the Democratic Party before he destroys America. The first step is to kick the Democrats out of Congress in the mid-term elections.

## REGULATIONS

President Trump cancelled about one-third of the useless, stifling federal government regulations that had been accumulating for decades. He reduced the size of big government and its control over our lives. But we're also inundated with restrictive regulations from state, city and county bureaucracies. Fifty or sixty years ago it was relatively easy to start a new business, or alter an existing one, because there weren't that many regulations compared to today. Now it's become a very complicated, expensive, and time-consuming process.

Money has to be spent on architects, designs, numerous inspections and permits – much of it totally unnecessary. Small businesses, the economic backbone of the country, suffer badly compared to big corporations which have deep pockets. They can easily absorb the costs and time delays when opening a new location, which the small entrepreneur can't afford. Consequently, many of them abandon their projects when they realize the difficulties they face because of ridiculous, cumbersome government regulations. More regulations also means more taxes because of the need to hire lots more personnel at taxpayer expense to enforce their absurd rules.

These impositions into our lives are nonsense – government out of control. Big government is bad government, and it's expensive. The AAUP promises to follow in President Trump's footsteps and eliminate the massive, asinine regulations at all levels of government until small entrepreneurs can quickly, easily and cheaply open shop. We will choose candidates for office at all levels of government to accomplish what's needed to get big governments and their regulations out of our way.

## ENERGY

President Trump did a great job making America energy independent. For the first time in 75 years we were not only energy independent, we were exporting oil to other countries for profit. President Trump opened the Keystone pipeline on his first day in office, which brought the U.S. huge amounts of oil from Canada, but Joe Biden shut it down on his first day as president, as well as cancelling fracking and drilling for oil. His shortsighted, ridiculous actions caused an immediate oil shortage. Prices for gas at the pump and for oil to heat homes zoomed higher, and inflation set in, causing the prices on all commodities to increase dramatically. Biden did that because he's become the pawn of the socialist, progressives – Alexandria Ocasio-Cortez, Ilham Omar, Rashida Tlaib, and Ayanna Pressley – and their impractical “Green New Deal.”

The irony is that transporting oil by semitrucks causes more pollution to the environment than the pipeline. It's vitally important that America leads the world in energy production to outpace Communist China, whose goal is to supplant us globally and dominate humanity with its nefarious ideology. We should utilize every means available to quickly develop our abundant resources of oil, natural gas and coal, which includes fracking and drilling. The conversion from fossil fuels and clean energy is desirable, but it must be done over an extended period of time that doesn't destroy the U.S. economy. In spite of all of the exaggerated fear of nuclear energy, it's very safe and is the best source of power.

We must build more nuclear reactors or ultimately fall behind China which is rapidly building them. Currently the U.S. leads China with 95 reactors compared to its 46, but they're poised to overtake us by 2030. We have only 2 under construction, whereas China is now building 46, with many more planned. Therefore, America must embark on a plan to construct more reactors or China will leave us in its dust. Also, the Keystone pipeline should be reopened, and drilling and fracking for oil should be resumed immediately.

That would restore the great economy we had when Donald Trump was president by making us energy independent again. Joe Biden has caused an economic disaster that must be reversed. There have been water shortages in the U.S. in the last few years. The AAUP proposes to build water desalinization plants on the east and west coasts, and the Gulf of Mexico, to eliminate water shortages in the future.

## INFRASTRUCTURE

Many roads and bridges in the U.S. are in need of repair or replacement, especially in the eastern part of the country. That's a very costly project for taxpayers, but the job needs to be done for the safety of our people. One way to cut the cost way down would be to utilize prisoners from jails and prisons to do the labor. The problem with using prisoners would be how to guard them so there's no escapes while out of prison on the job. Hiring a sufficient number of guards would also be very costly. The solution for this problem would be to use military personnel to monitor them.

There's well over a million active military that are stationed on bases throughout the country that are idle for the better part of most days. Since they're already being paid, it wouldn't be necessary to pay them anything more to act as guards on infrastructure projects. Prisoners incarcerated for violent crimes would be excluded from the selection to do the labor. This plan eliminates the big cost of labor, basically leaving the cost of materials, foremen and engineers. To incentivize the prison laborers, whoever does a good job would become a candidate for early parole or a shortened sentence. The AAUP would enact whatever legislation becomes necessary to facilitate our plan.

## MILITARY

The number one, most important function of our federal government is to protect America from invasion by a foreign power. Necessarily that means our country should have the strongest military in the world, especially because America has four very dangerous enemies – China, Russia, Iran, and North Korea. Because of our technology the U.S. still has the strongest military in the world, but China is coming on strong. In one important aspect we are lagging behind, and that is our missile defense system. Russia has the best ICBM defense system in the world, as well as the most ballistic missiles.

China has recently developed a hypersonic missile that they successfully tested by sending it around the world in minutes. There is no defense against that weapon because of its speed. Since China and Russia are enemy countries run by two thugs, America is in a very dangerous situation. It's imperative that the U.S. spends the money to develop a missile defense system that will destroy all incoming ICBMs from any enemy aggressor. President Trump had embarked on developing a new system but, unfortunately, he's no longer president due to a rigged election.

But, while he was in office, he did rebuild the military, much to his credit. The AAUP pledges to continue to build America's armed forces, as President Trump did, to ensure that our country remains ahead of rogue enemy nations for the safety and security of us all. Now we have an extremely weak president, senile Joe Biden, who has put the U.S. in jeopardy because of that weakness. China, Russia, and Iran have no respect for him and recognize how feckless he really is. As a consequence, Russia has invaded Ukraine, China is threatening to invade Taiwan, and Iran is on the cusp of completing the development of its first nuclear weapon.

In fact China and Russia recently conducted military maneuvers together. Nothing like these threats happened when Donald Trump was president because those adversaries respected his strength and knew they couldn't make any aggressive moves without serious, harmful consequences. Extremely important – the U.S. must develop its own hypersonic missile system to keep pace with China.

## INCOME TAXES

Americans are inundated with taxes of all kinds from all levels of government – federal, state, county and city. Typically a married couple has to have both spouses working to make ends meet and pay the taxes. The original tax code of 1913 was 27 pages long. The code had a total of 409,000 words in 1955. Today that has grown to 2.4 million words. It would take an average reader more than 8 weeks, reading 24 hours a day, to read the whole code.

It's tripled in size since 1975. This is absolute craziness. Many politicians have talked about simplifying this abomination, but nothing has actually happened. The AAUP will definitely simplify the code so it could be read quickly, within a half hour. We propose to have a combination of two taxes: (1) A flat tax based on a percentage of the taxpayer's income, with a higher percentage for high income payers, and (2) A nominal consumer tax on certain goods, especially expensive items. The gap between the superrich and everyone else has gotten wider and wider. Incredibly the two wealthiest people in the U.S have more wealth than the bottom 40%. Therefore there's a need for a higher flat tax percentage for the 650 billionaires in our country, many of whom benefited greatly from tax loopholes, to reduce the wealth gap.

In the AAUP tax plan, all loopholes would be eliminated so that big corporations, many that pay no taxes, will pay their fair share. This tax plan will eliminate most of the 74,000 IRS employees, thus saving tax dollars that support the IRS. Only a skeleton crew will remain to catch tax cheaters. Audits will become scarce, basically for cheaters. Importantly, to reduce taxes, the huge waste in the government should be addressed and eliminated. Also, all governments, federal, state, county, and city are way too big and cumbersome. In fact, more people work in government than in industry. To further reduce taxes, when the AAUP is elected to these seats of government, it will greatly reduce their size and power over the people, including eliminating an abundance of unnecessary rules and regulations which stifle small businesses. Government at all levels has gotten way too big and intrusive.

## CHINA

Even though Joe Biden said that China is a “competitor,” it’s obvious that Communist China is an extremely dangerous enemy that’s hell bent on dominating the entire world. China is very strong economically and militarily, thanks to America. That wouldn’t be of great concern if China wasn’t controlled by a brutal Communist regime that has little respect for human life and human rights. It recently successfully tested a hypersonic missile that traveled around the world in minutes that America would be unable to defend against if it were carrying a nuclear weapon. It’s therefore imperative that the U.S. builds a hypersonic missile defense system, if possible, and a hypersonic missile to keep pace with China’s arsenal, at warp speed. Russia also has developed these missiles and claims to have used one against Ukraine, but with a conventional warhead, not nuclear.

U.S. technology is working to develop our own supersonic missile because we’re in a very dangerous situation with two powerful adversaries, so funds should be disbursed by our government to accelerate its completion. The AAUP would definitely allocate that money, because the gravity of this peril cannot be overstated. President Trump did a great job rebuilding the U.S. military after 8 years of neglect and decline by the Obama administration. America is still number one economically and militarily in the world, but China is coming on fast and could overtake us by 2030. This has been caused by the stupidity of our politicians and the greed of our big corporations.

Richard Nixon opened the door to Communist China on his trip in 1972 – a big mistake. The reasoning was that if the U.S. helped China economically and technologically, it would eventually become westernized and become an ally. That never happened. Instead the U.S. created a monster that is jeopardizing our safety and possibly our very existence. In 1979 the U.S. signed a bilateral trade agreement with China while the inept Jimmy Carter was president which produced 4 billion dollars in trade that year.

In 2022 that figure had risen to 59.3 billion dollars, but only 11.5 billion dollars accounts for goods that China imported from us, leaving a huge trade deficit of 47.8 billion, which isn’t fair to America. There must be equal trade with China, if we trade with that communist regime at all. Essentially, we’ve given our money to them, making them extremely wealthy, and in return they’ve stolen our technology. Our big corporations have made huge profits by contracting with China to produce their goods with cheap labor. Most of the inventory in retail stores, like Wal-Mart and Target, have “Made in China” labels. Shockingly, 97% of our antibiotics and 80% of our pharmaceuticals, including life saving medicines, are made in China. That is absurd.

We’re in big trouble but it’s not too late to turn things around. We need to bring industry and production back to America immediately, using tariffs, sanctions, legislation or whatever to force our big corporations to comply. No federal contracts should be given to corporations that outsource to China. “Made in America” would also return millions of jobs to our shores. Our problems are now compounded because we have a weak, mentally challenged president, Joe Biden, who has diminished America’s standing in the world, to the delight of Xi Jinping, China’s president.

Consequently, China has become much more aggressive since Biden became president – threatening to invade Taiwan, expansion in the North and South China Seas, limiting democracy in Hong Kong, expansion into the Solomon Islands which threatens the historic presence of America and Australia, and its rapid military buildup. It's likely that Biden has been easy on the Chinese because he and his son, Hunter, have had lucrative financial deals with them. The U.S. has had a horrible time for well over two years due to the China virus (yes – the China virus). Let's not forget that this virus came from the Wuhan Virology Lab and was likely released to the rest of the world on purpose. After all, the Communist Party shut down and isolated the Wuhan Province to prevent expansion of the virus within China, at the same time that it allowed Wuhan residents to travel to other countries around the world, including the U.S.

The result has been almost a million deaths in America and over six million worldwide. The irony is that the U.S. had stupidly funded millions of dollars to the Wuhan Lab, through Fauci. What the hell was America doing giving money to a Communist lab?!! China, the largest maker of fentanyl, has joined forces with the drug cartels to smuggle it into our country, resulting in the deaths of our citizens, especially young people. Our economy was also devastated by China's virus. China hasn't offered restitution for the deaths and the economic harm it did to us. We need to get tough with China, as Donald Trump did. The U.S. owes China 1.1 trillion dollars. We should cancel that debt and seize all of China's assets in our country. Compared to the existential threat of China, America is mired in harmful, trivial nonsense – “woke culture,” imagined racism, “political correctness,” “cancel culture,” “gender identity,” “critical race theory,” “identity politics,” “equity” and ridiculous riots and property destruction.

America should stop this nonsense and come together before it's too late. Very importantly, we should form a coalition with our democratic allies worldwide to isolate China economically. The U.S. supplies China with 22% of their natural gas which we liquify in six of our plants, five of which were started by Trump. If we cut off their supply of natural gas, China would be devastated. Perhaps that would force China to change its aggressive ways. After all, democracies should not be supporting Communism which suppresses freedom. The AAUP would enact legislation and promote policies that would thwart China's goal of world domination.

## BIG TECH

Big tech has way too much power and money. Amazon, Google, and Facebook control 50% of the advertising in the U.S. The enormous money they've made has enabled them to buy other, smaller competing companies – 228 by Google and 111 by Amazon. They must be broken up into smaller entities to reduce the danger they present to control American lives. They have negatively influenced our culture, our politics and our marketplace by supporting the radical left, socialist Democrats, and the “woke” and “cancel” cultures they promote. Our private lives are being invaded by big tech, much to our detriment.

They have enormous political influence because they can massively disseminate their ideas through the internet, whether or not their messages are true and factual. They also violate the Constitutional right of free speech by picking and choosing the messages they deem to allow on their websites, banning statements from conservatives with whom they politically disagree – “shadow banning” – as they wrongfully did to Donald Trump. Since Elon Musk bought Twitter the extreme, progressive, socialist Democrats, and their lying, lame stream media have gone berserk with spurious accusations because they're terrified of his promise to open the door to conservative messages. They claim that he's going to spread “disinformation”, which is ironic, because that's all they do themselves. The AAUP will enact laws to stop this unfair nonsense.

## GUNS

The Second Amendment of the Constitution guarantees the right to keep and bear arms. The extreme left, socialist/Marxist Democrats would like to confiscate the guns owned by Americans under the guise of reducing gun violence and deaths. Of course, that is total nonsense. Their real reason is to have more control over our lives and more dependent on the federal government, which is the goal of the socialists, who want to transform our country into a disaster. In 2020 there were about 19,500 deaths by guns in the U.S., and 42,060 auto fatalities. In fact, 58% of gun deaths are from suicides.

Applying the leftist rationale, we should, therefore, eliminate cars. If the government confiscated our guns we wouldn't be safer – we'd be more at risk because the criminals aren't going to turn them over as directed. They'll hide them and crime will increase as a result because the thugs will know that their victims don't have guns to defend themselves. The AAUP does support strict criminal and mental background investigations for gun purchases, with accompanying photo I.D.s. We also support and will promote severe, long term prison sentences for crimes involving the use of a gun.

## ABORTION

There has been approximately 50 million abortions in the U.S. since Roe v. Wade was enacted, which was a terrible decision by the Supreme Court that had no basis in the Constitution. There are close to one and a half million abortions annually in our country – precious little humans that would've experienced the joys of life had they not been expunged. That's a monumental tragedy. Abortion is basically a pseudonym for murder. The terms "pro-choice" and "reproductive rights" sound good but they're basically a substitute for a harsher term – "pro-killing." A large percentage of women who have abortions have subsequent psychological problems – their consciences eventually turn on them. You may think the unfettered expressions herein are extreme but isn't expunging human life extreme?

There is nothing more precious in this world than a newborn baby, which all of those aborted fetuses would become if they weren't destroyed. When a baby is born to a mother, she has a new learning experience – to love in a beautiful, nurturing, overwhelming, incredible way that she's never experienced before. Unfortunately, a mother who aborts her baby will never realize that transforming God-given love. Since two thirds of the U.S. is Christian, it's obvious that many Christian women have abortions, or support it, which is definitely contrary to Christian precepts. Statistics show that a large number of abortions are performed on black women, who are 83% Christian. These are mainly done by Planned Parenthood, which is an abortion factory. In fact, 80% of their facilities are located in black neighborhoods. Planned Parenthood was founded over a hundred years ago by Margaret Sanger, an avowed racist who advocated using eugenics to diminish the black population which she thought was inferior and mentally defective, which we know is absurd.

Unfortunately, 450 million taxpayer dollars are donated to Planned Parenthood annually by our federal government, supposedly because of other services it provides women, when the big money is made from abortions. That's a gross misuse of taxpayer money and should stop immediately. That evil organization has made billions of dollars aborting mainly black and Hispanic babies – 45% black and 35% Hispanic. It also was the promoter of the Roe v. Wade lawsuit which legalized abortion, thus enabling it to make huge money by killing minority babies. Of course, the main reason minority women seek abortions is because they can't afford the baby because they've been economically disadvantaged by the Democratic Party.

Unfortunately the minorities in the ghettos and barrios don't realize what the Democrats have done to them, currently and in the past. The slave plantations in the old south were all owned by Democrats. The Republicans in the northern U.S. fought and died fighting the southern Democrats in the Civil War to free the slaves. After the war the Democrats started the Ku Klux Klan – the KKK. Today the ghettos and barrios are basically located in big cities controlled by the Democrats. For many decades they have kept the minorities dependent on them for welfare – meager handouts to get their votes. The Democrats don't want to lose control of the minorities, so they thwart the Republican's efforts to give choice of schools for minority kids, which negates their advancement by keeping them in substandard schools. That keeps them economically disadvantaged, unable to escape their penury, and under the Democrats control. So, the Democratic Party is directly responsible for the high percentage of abortions among blacks and Hispanics.

Abortion is brutal, especially partial birth abortion. One commonly used method is to insert a hypodermic needle into the baby's heart, inject poison to stop the beating and kill the baby. Ultrasound images show the babies faces writhing with pain. Forceps are then used to tear apart the baby's body parts and remove them from the womb, the head being the hardest to pull out. Full term babies, just born, that mothers don't want, are drowned in buckets of water or left to suffocate while the doctors and nurses watch. This is abominable and grossly evil.

There's disagreement over when a fetus becomes a baby. That shouldn't be the issue. The real question is when does human life actually begin. In that respect, it's been proven that life starts immediately upon conception. If you don't accept that, there's still no doubt that nine months after conception, a full term baby will be born if it's not expunged. Many women vociferously support abortion because they believe it's a woman's right since it's her body, the fetus is a part of her body, and anything that impinges on that right is anathema. But if the fetus is actually a part of her body, she would have 4 legs, 4 arms, 2 hearts, 2 brains, etc. In fact the DNA of the mother and the baby in the womb are always different, so obviously the baby is not part of her body.

Although the AAUP strongly supports equal rights for women in every respect, it doesn't apply to abortion, because the victim of abortion is a separate life inside of a woman's body. Restricting abortion therefore, isn't impinging on women's rights, it's protecting the rights of the unborn. Abortion isn't the right of a woman, it's a choice, but a bad choice. Someone may make the choice of shooting a neighbor, but it's not a right. It's a choice that would have serious consequences. A woman might make the choice to commit suicide because it's her own body, but it also is not a right. In fact, it's against the law.

The irony of abortion is that the great majority of women who support it in the name of women's rights will never actually have an abortion themselves. They're basically good, conscientious people who think they're doing the right thing – unfortunately they're not. They've been propagandized by the extreme left, socialist Democrats who use abortion as another means to further divide our people. A sensible alternative to abortion is adoption. There are enough people waiting to adopt a newborn to insure that all unwanted babies will have a home and parents. It's unfathomable how any Christian, or believer in God, can support abortion in good conscience.

Over 93% of Americans believe in God, who created all of us. As the old adage says, "Two things are certain – death and taxes." When we leave this world and meet God, we believe he'll be very pleased with those of us who were pro-life and didn't support the extinction of life which only he has the right to do. It's a short life. A hundred years is a split second compared to eternity. Every person should think about this question. Will I be held responsible by God for supporting or having an abortion? God has favored America with incredible blessings. It has been the bastion of freedom, morality and success. But will he continue to favor us if we displease him by killing millions of precious lives in the womb that he created?

However, there is one exception that justifies abortion – the imminent threat to the mother's life. Twenty-five countries have banned abortion entirely and many more have made it illegal except in dire circumstances. There is definitely a malady among Democrats who support

abortion, including Joe Biden and Nancy Pelosi who are CINO's – Catholics In Name Only. Our Founding Fathers would find it reprehensible that our Supreme Court, and other government entities, would use a misinterpretation of the Constitution to justify killing babies. The AAUP will do everything in its power to protect the unborn's right to life, liberty and the pursuit of happiness as protected by the Constitution.

## **HABITAT FOR DISADVANTAGED YOUTH**

There are over 300,000 vacant buildings owned by the federal government in the U.S. In addition, there are tens of thousands of empty buildings owned by states across the nation. Of course, when they sit empty, they deteriorate. The highest and best use for them would be to rehab them where necessary and use them for teaching trades to disadvantaged young people – plumbing, electrical, masonry, carpentry, computer technology, and others. Jimmy Carter’s “Habitat for Humanity” is a good example of a humanitarian program that utilizes volunteer help. In fact, over one and half million people have volunteered under his program to build houses.

That program is probably the only thing he’s ever done right, and we give him credit for that. The AAUP program, “Habitat for Disadvantaged Youth,” will also need volunteers, who will be offered income tax deductions to induce their help. The first phase of the program would be to refurbish buildings that have deteriorated to make them into a combination of teaching facilities and living quarters. Next, furnishings and equipment that are donated, also for tax deductions, would be installed. Volunteer teachers will then be used to train the young students, who will live on the premises. The teachers and the monitors for the students residence would have nominal salaries paid with donations and subsidized with government funds.

Donations would also have extra tax deductions. Habitat for Disadvantaged Youth will also qualify as a non – profit charity for tax purposes. This program will benefit America greatly because disadvantaged, homeless young people all over the country will be saved from lives of poverty, drugs, and crime by training them to enter the labor market. This will be a great opportunity for minority youth in particular. Also, the welfare rolls will decrease, saving taxpayer dollars. More tax revenue will be paid because the trainees will ultimately pay taxes once they get jobs.

Since crime will be reduced, especially drug related crimes, there will be fewer inmates in jails and prisons, thus saving even more taxpayer dollars. While in the program, the trainees will have regular classes teaching them the value of honesty and hard work to lift them out of poverty and into mainstream America. This AAUP program will be a great benefit to our nation. Also, once the trainees are employed, they could be required to pay a small portion of their income to the program to offset the operational costs in the future.

## MEDICAL INSURANCE

The apparent objective of Obamacare was to have all Americans insured. Obama and the Democrats enacted the plan with a provision that required everyone to subscribe to it or pay a hefty fine. That didn't happen because millions of healthy young people, who didn't care about health insurance, opted to pay the fine, or not pay it at all, thus leaving as many people without insurance after the plan as before. The health care system before "Obamacare" was quite adequate and you had the freedom to choose your plan and doctor.

Obama promised that we'd still have that choice. That was an intentional lie, as you know. "Obamacare" is a disaster. Premiums have risen dramatically and healthcare costs have escalated. The best system was the system prior to Obama's useless presidency, with the addition of coverage for preexisting conditions. Also, to lower insurance payments, America should have a free market system whereby policies can be sought across state lines. Accordingly, the AAUP will promote a beneficial plan to give our people the best medical care at a low cost.

## **BUSINESS CO – OPS**

There are many people working hard in businesses for low pay that have little hope of ever saving enough money to start their own businesses. Small businesses are the backbone of the U.S. economy. They generate about 80% of the national income and employ about 80% of the workforce. In recent years business co-ops have become popular, whereby groups of employees pool their available money and experience to buy the businesses they work in, or start a new enterprise. The concept actually goes back to the mid nineteenth century, but has become very popular in the 21<sup>st</sup> century.

The AAUP believes this is a great idea for the advancement of the average worker. Consequently we propose to establish low interest rate, SBA (Small Business Administration), long term loans to co-ops to help them get established. These loans would have a temporary moratorium on payments to help a business become profitable. Employees experience will be more important than financial contributions. The AAUP thinks it's time for the little guy to get a bigger piece of the pie, and this program would be a good start.

## WELFARE

Welfare and food stamps are a necessity for many people to subsist. But the system needs serious reform because of welfare fraud that costs taxpayers over 100 billion dollars annually. There's been many cases where people living in expensive homes and driving luxury cars were welfare recipients. To stop these highly immoral cheaters, very severe, minimum, prison sentences should be mandatory upon criminal conviction. However, anyone receiving welfare benefits should be required to work, in or out of the home, unless disabled, until they find regular employment.

If no outside jobs are available, in-home jobs could be supplied to do work for government agencies – clerical, computer work, etc. Of course, the long-term solution to reduce welfare would be to eliminate hardship and poverty in the ghettos and barrios with more development programs like Donald Trump's "Neighborhood Opportunity Program", and stop the Democrats from hindering school choice so minority kids can get a better education. The AAUP will get it done.

## **RELIGION**

### **And the attack on Christianity**

Most Americans have been led to believe that the Constitution and the Bill of Rights say that we must have the “separation of church and state.” That’s not true. Nowhere in the Constitution is there any such wording. What it actually says is this in the First Amendment – “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof.” That’s all – no more – no less. The reason for the Founding Fathers’ choice of that statement was that they didn’t want government to be involved in or control religion because that would invite corruption in churches.

That didn’t mean that there shouldn’t be religious symbols, ceremonies, prayer, religious drama, and references to God in the public square and in government run entities. In fact, the Founding Fathers prayed together at the beginning of every Constitutional Convention. Oaths in court end with the statement, “So help me God.” Our coins are embossed with the words “In God we Trust.” The Pledge of Allegiance includes the phrase “Under God.” References to God have always been replete in our culture and government, until recently.

In the last few decades a fringe element of mostly atheists have attacked our religious freedom by misinterpreting the Constitution, and too many of our politicians and big companies have bent to their will. Since over 93% of Americans believe in God, and 65% of us are Christians, we’re being pushed around by less than 3% of our population who are impinging on our right to religious freedom. That is utter nonsense. We have the right to have mangers in school at Christmas displaying the Holy Family, the right to have crucifixes in classrooms or wherever else we desire, the right to say “Under God” in the Pledge, the right to display a Menorah or other Jewish symbols, the right to refer to God and have religious stage plays in school, and, overall, the right to display or say anything related to God or any religion in public and government places.

The AAUP encourages people to say “Merry Christmas” or “Happy Hanukkah” in stores, but if it’s obvious the store employee has been directed to not respond likewise, that store doesn’t need your business. It’s time to fight back. Students are no longer taught about God or morality in public schools, and since most mothers have to work, neither are they being taught sufficiently at home, so it would be important to bring God back to the classroom. The AAUP will enforce the right to religious freedom as absolutely stated in the Constitution.

## EDUCATION

Education in America is a disaster. Too many kids graduating from high school are basically uneducated. Our enemy, Communist China, is number one in the world in science and math, the two most important subjects. In 1990 education in America was sixth in the world – now it's 27<sup>th</sup>. The Democratic Party and the teachers' unions are responsible for this catastrophe. They stifle quality education, especially for the children living in the ghettos and barrios, by consistently defeating legislation that would allow free choice of schools for the kids.

Statistically private, charter and religious schools are superior to public schools run by governments. The AAUP will enact legislation to allow choice of schools for all American children, enabling them to get a better education. That would especially be important for minority kids living in substandard areas that attend substandard schools, so that with better educations they'll be more likely to have successful lives. The teachers' unions have entirely too much power. Their policies have had very negative consequences. Tenure is a big problem, in particular.

There are about 2.3 million teachers on tenure, which usually becomes automatic after three years on the job. The problem with tenure, which restricts the ability to fire teachers, is that it protects bad teachers. Conversely, it does protect good teachers from being replaced by school boards with cheaper help. The AAUP believes the solution to this dilemma would be to evaluate every teacher periodically with written tests to determine competency. Failure would cause termination, while passing would protect tenure.

We also must return to teaching basics in all schools – science, math, history, computer science, literature, and reading. A grading system using A, B, C, D, and F, should be rigidly applied, and if a student fails with an F, he or she must go to summer school or repeat the subject. Teachers must be prohibited from teaching, discussing and commenting on politics, sex, gender identity, social issues and anything else that's not related to the subject being taught. "Critical Race Theory," which Donald Trump had banished from school curricula, will be banned again since Joe Biden foolishly reinstated it, because it teaches kids to be racists. In fact, Biden's "America Rescue Plan" misused billions of taxpayer dollars by giving a sizeable amount of the COVID-19 relief money to states to teach "critical race theory," "equity," and "diversity" in their schools – brainwashing Americas' kids. That's outrageous and very wrong.

Teachers who violate these rules should be suspended or terminated. Also, all books in school libraries that depict or narrate sex acts, sex in general, or gender identity, should be banned because they'll damage immature minds that aren't ready to absorb their content.

Morality in America has declined dramatically, resulting in rapid escalation of crime and violence. Morality must be restored, starting in our schools. The AAUP will enact legislation to require that all schools, from kindergarten through 12<sup>th</sup> grade, must include in their curricula, one period daily that teaches morality, honesty, integrity, fair play, ethics, dangers of drugs and alcohol, the importance of family, and the value of God-given human life. We must be sure that our schools produce moral, intelligent and patriotic citizens that will contribute to our great country.

## FAKE NEWS

The dominant, leftist media, namely CNN, MSNBC, ABC, CBS and the New York Times, etc., are lying to the American public. President Trump has accurately labeled them “fake news.” Basically, they hate him so much and so irrationally (Trump Derangement Syndrome), that they distort, omit, and concoct reports to continually disparage him, no matter how much harm that does to America. Newsmax, Fox, and One America News report the truth about the extremely important issues that our country faces. Prior to the 2020 election the leftist, fake news neglected to report Hunter Biden’s, Joe’s son, many financial shenanigans in Ukraine, China and Russia in the last few years, which also benefited Joe, nor did they report Hunter’s infamous “laptop from hell”.

After the election, 20% of the Biden voters, who were polled, said they wouldn’t have voted for him had they known about the lucrative, dishonest dealings by Hunter, which also lined Joe’s pockets. Of course, those voters only watched the fake news – never a conservative channel. Every day, and every hour, the corrupt fake news broadcasts and prints so-called news that’s the furthest thing from reality and truth. In fact, they’re part and parcel of the Democrats movement to transform our great country into a socialist disaster. Unfortunately, the fake news greatly outnumbers the conservative media.

Consequently, the viewers are inundated with their lying propaganda. Their high paid reporters, who dare to call themselves journalists, are actually dupes of the Marxist, socialist billionaire, George Soros, who’s an evil, ruthless leftist seeking globalism for his own self-aggrandizement, power, and to escalate his wealth. There should be punitive consequences for media that distorts news or knowingly fails to report important issues and facts. The AAUP proposes to enact FCC regulations to monitor them accordingly and apply punitive damages for obvious lies and distortions.

## GENDER IDENTITY

God created 2 genders – male and female – period. All of us are born as one or the other, established by DNA. It's undeniable that he created men bigger and stronger than women, with little exception. But about 5% of our people, for one reason or another, don't psychologically identify with their biological sex. They're called "gay." Many studies have been done which show that most gay people who have psychological reorientation reidentify with their biological sex. In one particular study done by a psychologist over ten years 43 of 50 gay men became heterosexual – they grew body hair when there had been none, their voices deepened, their movements became masculine, and they got married and had kids. Obviously, their male hormones ramped up. A very small percentage of our population, about one-half of one percent, has had sex change surgery. Sadly, the suicide rate among transgenders is 20 times higher than the general population. Adolescents who have thoughts of having a sex change should not proceed with that radical surgery because studies have shown that they will change their minds in due time. It has also been determined that puberty blockers prescribed prior to surgery causes severe psychological harm.

There's debate whether gays and lesbians have psychological problems caused after birth, or their sexual preference was innate before birth. Regardless, these people have the right of freedom of choice, regardless of whether or not we agree with their lifestyle. They are God's children, he loves them, and we should also. They deserve our respect, as all human beings do. We shouldn't judge them – "Judge not lest ye be judged." However, there should be, in fairness, some limitations. First, transgender women (formerly men) shouldn't be allowed to compete in women's sports.

Although their sex organs have changed, they typically retain the same size and strength they had before the change, so competing against women just ain't fair. Next, males must be prohibited from entering female restrooms, whether or not they psychologically want to be female. The socialist Democrats, trying to further divide our country, have declared that pronouns which historically have been used to identify the sexes should be expunged from our culture, like man, woman, he, she, etc. The Democrats have lost their collective minds. They're trying to blur the differences between the two sexes. But the differences are distinct – physically, emotionally, and psychologically. As the French say, "Vive la difference."

## CRITICAL RACE THEORY

Critical Race Theory (CRT) is an evil, false racist theory being taught to children from kindergarten through college in schools across America by nefarious or misguided teachers. The concept teaches that white people are inherently guilty of racism because of their skin color, which connects them to the slavery of the blacks by the whites in the old south. These teachers are progressive Democrats who neglect to tell their students that the slaves on the southern plantations were all owned and operated by white Democrats, and that it was the northern, white Republicans that ended slavery by fighting and dying in the Civil War.

Because of CRT white kids are being shamed and bullied in schools, which diminishes their self-worth resulting in psychological problems. Critical Race Theory is Marxist based racism itself. Nobody in America should be deemed a racist due to skin color, whether white, brown, black, yellow or red, or any shade in between. Teachers who damage young minds with this nonsense should be fired and their credentials cancelled. They're a disgrace to the honorable teaching profession.

Furthermore, this extremely harmful theory is being promulgated to young, vulnerable minds by progressive leftists who hate America and are trying to create racial division to further their pernicious political goal to transform America into a socialist country. Fortunately, many parents have gotten angry over the teaching of CRT to their kids and have protested at school board meetings. Incredibly, Biden's administration declared them to be "domestic terrorists," and some of them were admonished or arrested. The AAUP will enact legislation to prohibit CRT, or any other racist theories, from being taught in any school in America.

## **PRISON REFORM**

There are approximately two million prison and jail inmates in the U.S. – the highest number in the world. About 75% of them are functionally illiterate. When these prisoners are released, 70% will return to prison for committing more crimes. Studies show that prisoners who are literate have only a 16% recidivism rate. The average daily cost to incarcerate an inmate is \$90 – an expensive drain on taxpayer dollars. It doesn't take a rocket scientist to assess that the solution to this problem is to educate prisoners.

In addition to a basic education for literacy, mandatory trade classes should be taught to prepare them for release into society. Classes should also be required to teach prisoners morality, honesty, and integrity, related to God, to instill virtues. Some prisons are literally run by violent inmate gangs that deal in illegal drugs. That is incredible and must be stopped. Gangs should be banned from all prisons and any violation by a prisoner should result in solitary confinement, or an extension of sentence.

Severe criminal penalties should be incurred by anyone taking illegal drugs into a prison and an inmate caught using them, or selling them, should have an automatic extension of sentence. Discipline in prisons should be comparable to military discipline in the Marines. Rules must be rigidly enforced and violence should incur time in solitary confinement. The overall goal of prisons should be to educate and morally reform the inmates so they'll have productive lives when released.

## HEALTH, OBESITY, & FOOD

In the U.S. more than two thirds of the adult population is overweight or obese – 36.5% obese and 32.5% overweight. As a consequence, we have accelerated health problems and lower life expectancy. Peer nations are doing better than us. The main reason for this decline in health relates to our food supply and habits. Most of the products in the supermarkets are devitalized, overprocessed, and loaded with harmful chemicals, sugars and fats. The American palate is addicted to junk food, whether bought in markets or restaurants. Huge profits are made by big corporations which produce cheap junk food like breakfast cereals, soft drinks and chips.

People succumb to their TV ads and buy this stuff without realizing the serious harm it'll do to them and their kids. Sugar, in particular, is highly addictive and very harmful. It's the main cause of heart trouble, cancer, and diabetes. Most people never read the ingredient labels on the food they buy – a big mistake. Big food companies spend multi-millions of dollars through their lobbyists to secure the FDA's approval of their dangerous products. They make much more profit by preserving their products with carcinogenic chemicals that extend their shelf life.

Basically, most of the food Americans eat is a bunch of harmful junk that causes debilitating illnesses. You are more at risk, for example, of getting the China virus when you have a junk food diet that compromises your immune system. We must educate our populace, starting with kids in school classes, about nutrition and health. The old adage "you are what you eat", is very true. If you eat junk your body will become junk. Also, the decline of health in America puts great stress on our healthcare system, and the attendant costs. That increases taxes because many health programs are government subsidized. The AAUP will enact legislation to monitor the food supply more closely and force the big food corporations to produce healthy products for American consumers.

## COVID

The COVID – 19 virus, which China purposefully released to the world, has devastated America. Close to one million people in our country have died as a result. The Chinese Communist Party has blood on its hands. When the virus first appeared in the U.S., President Trump instituted travel restrictions on China for which he was vilified by the Democrats, saying he was xenophobic and overreacting. Nancy Pelosi was on TV in Chinatown telling viewers to “come on down.” Of course, Trump was right and the socialist Democrats were wrong. Trump’s “warp speed” program developed 3 vaccines in record time, which senile Joe Biden took credit for when he took office.

Biden ran for the presidency mainly on the pandemic devastation, saying he was going to eliminate the virus. He’s failed miserably. Under Trump in 2020, there were 362,000 Covid deaths. Under Biden, by November 2021, there were 414,000 more deaths. That’s an unsettling disaster along with the many other disasters Biden caused in less than a year. The 2020 lockdown, advised by Dr. Fauci, devastated the U.S. economy and caused great harm to our children whose education and social development were stopped due to isolation. As it turns out that was all unnecessary because it didn’t stop the virus.

Now over 80% of our people have been vaccinated, and that’s good. But vaccinations should be a matter of personal choice and nobody should be fired from a job, private sector or government, for not getting vaccinated. That’s a person’s Constitutional right – Freedom of Choice. Now we have a variant from South Africa named Omicron that has spread to many countries, including the U.S. It’s imperative that we don’t deal with this variant, or any other in the future, by having another lockdown. So far Omicron seems to have mild symptoms compared to COVID – 19, but we should do everything we can to lessen the impact.

In addition to being vaccinated, it’s very important for our populace to build their immune systems to withstand Omicron and any future viruses. In this respect we are our own worst enemies. Americans are obese, junk food eaters, which causes decline in immunity and opens the door to viruses. The AAUP will promote programs to educate the people to the importance of nutrition and health to prevent catching a virus. Changing Americans eating habits will also greatly reduce heart problems, cancer and diabetes, the 3 main disease killers in our country.

## THE HOMELESS

There are roughly 600,000 homeless people in the U.S. on a nightly basis. Forty percent of the men are veterans, 10.2% are kids, about 30% are women, 38% are alcoholics, and 26% are drug addicts. There are many reasons people fall into the homeless ranks. Among them are unemployment, extremely low income, divorce, medical costs, health problems and addiction. Approximately 13,000 of the homeless die every year – a far higher rate than the average in the total U.S. population.

Unfortunately, the number of people descending into the homeless ranks is accelerating rapidly. California has the most homeless. Many adults can't find the support they need after dramatic life incidents after the age of 50. With proper support these people could rebuild their lives. They need more help than they currently get.

They're our fellow citizens, God created human beings, and we must do right for them. Too many people discount the homeless as all being drug addicts, but that is wrong. In any case, the 26% that are drug addicts need help and shouldn't be written off as hopeless cases. The AAUP has a plan to solve the homeless problem called "Habitat for the Homeless." This program will function in a similar way to our plan "Habitat for Disadvantaged Youth" at a minimum cost to taxpayers, and maybe none whatsoever. (Refer to the chapter "Habitat for Disadvantaged Youth," for details).

## CULTURE

America's culture has seriously declined over the past several decades. Honesty and integrity have been diminished by the obsession for money and power – Congress being a good example. We live in an overly aggressive, excessively stimulated, in-your-face society. The greedy, big media corporations are largely responsible for the cultural and moral decline. They make exploitative films and music loaded with sex and violence, which would've caused their arrest 60 or 70 years ago.

But today they dump this desensitizing and degrading junk into the public arena without punitive consequences, which seriously harms young, impressionable minds. The Constitution does protect freedom of speech, but there are limitations. For example, you can't yell "fire" in a crowded theater if there's no fire. The AAUP proposes to enact new FCC regulations that would put an end to this harmful nonsense. Unfortunately, our schools typically don't teach the traditional values upon which the Founding Fathers created our nation – honesty, integrity, and morality. That should change.

Since over 93% of the U.S. population believes in God, the best thing for our kids would be to teach those values as coming from him, in spite of the objections from the extreme, progressive, socialist Democrats and the 2.4% of our people who are atheists, that are hell bent on eliminating God in our schools and public places under their fabricated concept of "separation of church and state", which they claim is in the Constitution. In fact, it's not in the Constitution anywhere. It actually says, "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." That was designed to protect religion from control by the government. In fact, 52 of the 55 signers of the Constitution were devout Christians, and 37 were ministers.

They obviously weren't excluding God and religion from the American culture. They said prayers to begin every meeting of the Constitutional Convention. The presidential oath of office and swearing – in to testify in court ends with, "So help me God." "In God we Trust" is on our coins, etc. etc., but the liberal, progressive Democrats have succeeded, at this point in time, in misinterpreting the Constitution and eroding the religious freedom of the overwhelming majority of God loving Americans. Prayers and religious symbols aren't allowed in schools. Store employees are told to not say "Merry Christmas" to customers, etc. This nonsense must stop. When America abandons God, perhaps God will abandon America. The AAUP will enact legislation to bring God back into schools and the American marketplace.

The human spirit is nurtured by beauty – art, poetry, good music, nature, quality films, etc. But it's desensitized by violence, sexploitation, and cacophonous music, all of which we're inundated with by the entertainment media. Several decades ago a meaningful experiment was conducted. Two separate rooms were filled with identical potted plants under the same environmental conditions. Loud, strident music was fed into one room and beautiful symphonic music was piped into the other. In 30 days all of the plants in the strident music room died, but the plants in the symphonic music room had thrived and almost doubled their size.

We're sure you get the point. Cells are cells, whether plant cells or brain cells. Like the plants that died, our populace, especially our young people, is having their brain cells fried by the junk that the big media disseminates so that they can make huge money. The AAUP will vigorously promote the arts and quality entertainment of all kinds to diminish the effects of big media trash.

## **SOCIAL SECURITY AND MEDICARE**

Social Security and Medicare payments account for a large portion of the federal budget. It's very important that we preserve those programs because they're so vital for Americans' welfare. Besides, the government owes those funds to the taxpayers who've been paying into them for years. But because of the profligate spending by our lawmakers, they're in jeopardy.

First, we must cut federal spending way down, eliminate "Pork Barrel" projects by people in Congress, eliminate unnecessary federal departments, and stop the enormous waste in government. For starters, about 68 billion dollars is lost to Medicare and Social Security fraud annually. That is unacceptable. Those crooks who cheat the taxpayers should serve long prison sentences to discourage others who might do the same.

## **VETERANS**

Veterans' benefits and interests will be primary in the AAUP. Americans owe more to them, and our law enforcement, than we can ever repay. We must make the care of veterans and their families a number one priority. The AAUP will guarantee that veterans will have the best health care at the lowest cost, or no cost when appropriate. We will closely inspect and monitor all VA Hospitals when necessary.

No veteran shall have to wait for medical care. They will go to the top of any waiting list. That will apply to all benefits to which they are so deservedly entitled. The AAUP salutes the best and the bravest.

## STUDENT LOANS

Approximately 1.2 trillion dollars is owed to the federal government by student loan borrowers. Joe Biden and his Democrats have proposed cancelling those debts, which would then have to be absorbed by the taxpayers. That is unfair and economically ridiculous. It's unfair to those people who made student loans and then paid them back already. If the loans are cancelled for those who still owe them, then in all fairness the people who've paid off their loans should be reimbursed their money, further hurting the taxpayers. An alternative might be to lower the payments for people who are struggling to pay their debt, so that they will eventually be paid. To have payments lowered, an applicant would have to prove hardship.

## SUMMARY

Some people who read the AAUP platform will object to its statements that depreciate Joe Biden and the Democrats. But we said the very important truth, and it needed to be said. All that senile Joe Biden had to do when he fraudulently became president was to continue with Trump's policies, which had been extremely successful. Instead, he cancelled them and, as a result, we have a failing America. In fact, Biden's presidency threatens our way of life, our country and the world in general. We invite people from all political parties to join our movement to rescue America before it descends into socialism.

Most voters have probably been members of one party or another for many years, which makes it very hard for them to make a switch, no matter how much they should for their own welfare. They take it personally when their particular party is attacked. That's akin to watchers of sports who root loudly for a team like they own it, when they don't. The AAUP urges people to objectively consider what's best for themselves and our country, instead of blindly adhering to the policies of a party because of a long affiliation. The extreme, leftist Democrats' craziness is bringing America down – defunding police, riots, crime, open Mexican border, 9% inflation, socialism, high taxes, fomenting racism, inferior education, high medical cost, and much more. We must restore law and order, and prosperity for all citizens now, or suffer a decline from which we might never recover. It's already started. Let's go Brandon. God bless America.
