Are The High Cost of Phone Bills Getting You Down...?

Call KCCi, Because Business is On the Line...!

Get Your Free Professional Telecom, Data & Wireless Services Audit by

Services - *Voice - Local and Long Distance, International & Toll Free Services, including T1 & PRI*

Service providers offer different options and plans for voice services. An all-inclusive evaluation of usage, call traffic, and call type may reveal that another service provider might be better for your company's bottom line. Many customers pay for services and features they never use.

Data Networks Technology – *MPLS, Private Line, VPN, Satellite, Ethernet*

It's difficult for a business owner or manager to evaluate the efficiency, capacity and ROI of their existing network. With new technologies being introduced almost daily, it is imperative to keep up with the innovations and developments in the data communications field. Not adopting the most recent, proven technologies can not only hurt your competitiveness, but could diminish your network efficiency and increase your costs.

The best approach is to invest the time in a strategic planning exercise to identify your diverse networking requirements. Then identify the technologies most capable of meeting those requirements to improve your organization's productivity.
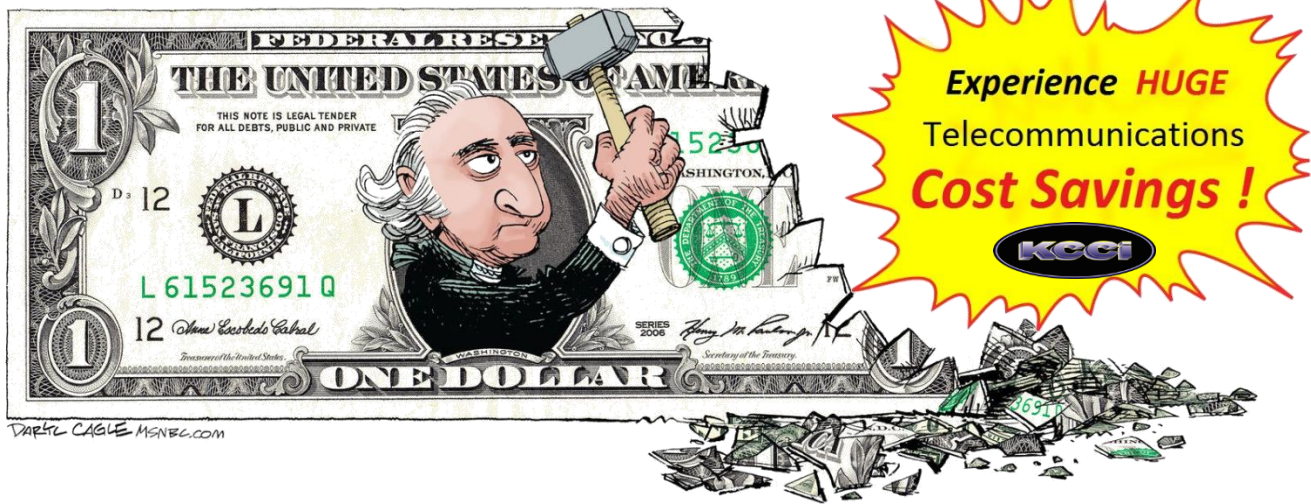

Internet – *DSL, DS1 (T1), DS3, OCx, Ethernet*

Internet applications and services are continually being developed, refined and advanced which requires more and more capacity and speed. Discovering the right match between your requirements and the options from service providers is a challenging and exhausting task. Additionally, insufficient broadband to handle your requirements will have an adverse effect on your organization's efficiency and productivity.

Wireless - *Wireless Phones, Smart Phones, Tablets*

With Smartphones, Tablets and BYOD, (Bring Your Own Device) Mobility is definitely a hot topic in today's IT market. Just look at some of these statistics: 32% of US employees are mobile workers; There was a 65% increase in mobile workers in 2016; Mobility is the biggest trend across the tech industry investment and innovation, even outpacing the cloud computing trend; 50% all adults go online remotely; BOYD, is a phrase that's become widely adopted and refers to employees who bring their own computing devices, such as, smartphones, laptops and tablets into the workplace for use and connectivity on the secure corporate network. All in all, today's modern businesses are going mobile in a big way to enable employees to become more productive and responsive to customers.

The Importance of a Proper Business Communication Services Audit - If only companies knew the importance of having a proper telecom, data and Internet bill audit, they could save lots of money that could be directed in more productive areas of their business. It's difficult to oversee a telephone bill audit with all of its complexities. Telecom bills encompass so much detail that it's almost impossible for most companies because they the lack resources and the knowledge base to handle telecom expenses. Most of the time, they end up paying a lot more than they should.

KCCi has more than 30 years of industry savvy to help with the business communications contract negotiating process. Why not let KCCi™ assist your company with its telephone bill audit? We help control expenses; create efficiency and productivity, which allows our clients to fully manage all aspects of their telecom costs. We oversee services such as:

- ✓ *Local & Long Distance Services* (*Voice/International/Toll Free/T1 & PRI Services*)
- ✓ *Internet Access, (DSL/DS1 (T1)/DS3/OCx/Ethernet)*
- ✓ *Audio & Video Conferencing*
- ✓ *Local & Wide Area Networks (WAN/LAN/MPLS/Private Line/VPN/Satellite/Ethernet)*
- ✓ *Enterprise Wireless, (WiFi/WLAN/VoLAN/Microwave)*
- ✓ *Mobile Cellular Services, (Wireless Phones/Smartphones/Tablets/PTT/Mobile Broadband/Data/Enterprise Productivity)… And, Yes, We Can Help with Cell Phones Too !!!*

You have a business to run! Profits to increase! Employees to motivate! Clients to thrill & amaze! You may not have the time or the resources to analyze, audit and evaluate the efficiency, capacity and ROI of your existing telecom, data, Internet and wireless technology services – For more than 30 years, thousands of businesses throughout California and the nation have relied on the experts at KCCi for a wide variety of telecommunications and data products & services.

KCCi provides our enterprise clients of every size with optimal communication performance across convergent technologies. We are at the forefront of today's information age - delivering complex voice, data, Internet, hosted cloud services & carrier services, video surveillance, and related digital products at increasing speeds and in ways that both; satisfy and delight our customers.

All of this occurs while our clients benefit from potential cost reductions. So, if you haven't reviewed your telecom options recently, there are significant changes occurring in both premise-based & cloud-based telephony technology. All with pricing that's certain to grab your attention.
