

Zoho **WorkDrive**

Unified
file management system
built for teams
that work together

Zoho WorkDrive is an online file storage and content collaboration platform for modern teams, small businesses, and large enterprises.

Work as a team

Store and manage files in a shared space with Team Folders.

Create. Edit. Share.

Shape your ideas, together. Brainstorm with your team in real time using Zoho Office Suite.

Accelerate data discovery

Use OCR and Object Detection to locate images and scanned docs by simply searching with a keyword.

Prevent data clutter

Associate purpose-based classification to documents and organize your team's data with Data Templates.

Assign role-based access

Set appropriate permissions for Team Folder's members.

Monitor team activities

Get a complete audit trail to track everything happening within your Team Folder.

Categorize your files

Create personalized Labels based on how you want to arrange your shared and personal files.

Share beyond boundaries

Create external share links or directly share a file or folder with an external user via email.

Record seamlessly

Meet WorkDrive Snap, a video-based, asynchronous communication solution that combines the power of video calls with the flexibility of a chat.

Invite guest users

Invite users to your WorkDrive account, assign permissions, and collaborate with them in real time.

Advanced analytics

With WorkDrive, you can efficiently manage access, structure, and security for your knowledge base.

Uninterrupted file access

WorkDrive offers desktop and mobile apps to help you stay connected to work from anywhere, even with limited internet access.

Guaranteed data security and privacy

Zoho WorkDrive has the functions of a typical cloud storage system, coupled with features and functions that drive security, ease of sharing and searching for files, and ease of communicating with the internal team about a file. This solution is a business owner's wise investment due to its superior qualities and cost-effectiveness.
