

Oldpark Road Public Realm Improvement Plans

On the stretch of the Oldpark Road that passes through the Lower Oldpark neighbourhood, the planned Lower Oldpark Road public realm improvement work include:

- Provision of natural stone paving at the front, sides and rear of the former Oldpark Library building and at the entrances to Century Street, Albertville Drive and Manor Street (including the triangle of land at the front of Filor Court) and on a stretch of the Oldpark Road, on both sides, below Shannon Street.
- Resurfacing of remaining pavements with asphalt along the main Oldpark Road.
- Resurfacing of on-street parking bays along the main Oldpark Road.
- Retention of existing trees, and planting of new trees, on footpaths along the main Oldpark Road.
- A reduction of the sharpness of the corner of the Oldpark Road/ Manor Street junction, making it easier for traffic coming down the Oldpark Road and entering Manor Street.

Provision of new litter bins on the main Oldpark Road.

- Provision of a new pedestrian crossing at the same location in front of the old Oldpark Library building.
- Possible provision of new bicycle lanes on the main Oldpark Road.
