Report Information:

This report displays tee time utilization for the course(s) and date(s) selected.

Each hour block is analyzed to show how far in advance the active tee times were reserved, as well as the percentage of available rounds that were filled for that hour.

This report only reflects data that is on the EZLinks tee sheet at the time the report was generated.

"Revenue" data is referring to the green fee amount that is applied to each individual golf round on the tee sheet.

Time slots that are filled with Events are considered to be utilized.

Time slots that are filled with Blocks are not calculated into utilization.

Total % Utilized: This shows the percentage of available rounds that were sold.

% of All Rounds Booked: This shows how many days in advance the active tee times were reserved.
