SET OF 4

Late Model

Engineered for Late Model performance. This 12V 7" electric fan features a durable 80-watt motor and delivers 800+ CFM of focused airflow—perfect for wheel cooling systems. Available in DeWalt 20v or Milwaukee m18 options, it is powerful enough to handle the heat after long features and heavy braking. This fan helps reduce fade, protect components, and keep your lap times consistent. Low amp draw, high airflow, race-proven reliability—a must-have for serious Late Model competitors.

\$950

SET OF 4

Legend Car

This compact 6" 12V electric fan is built for high-demand racing environments, making it the ideal choice for Legend Car wheel cooling setups. Available in DeWalt 20v or Milwaukee m18 options and featuring an upgraded 90-watt motor that draws 7.5 amps and pushes over 513 CFM. It delivers powerful airflow right where you need it—keeping brake and hub temperatures in check stint after stint.
