## Ozone Generators

- Eliminate smoke, mold, mildew, food, and paint odors
- 12-hour timer with hold function
- Collapsible handle for easy storage
- Non-marketing, polyurethane feet
- Safety fan guard
- Stainless steel components
- For use in unoccupied spaces only - use only as directed

## Hydroxyl Generators

**How it Works:** These generators use UVA lamps reflecting off a coated super reactor screen - by reflecting the UVA ray of highly reactive titanium dioxide catalyst, a hydroxyl radical is formed. The photocatalytic reaction uses the H<sub>2</sub>O in the air to create super hydroxyl radicals, free electrons, and ionized hydroperoxides. When these molecules are introduced to a contaminated area, they will decompose odors, germs, gases, and organic pollutants into carbon dioxide and water.

- Does not produce ozone - units 100% safe for use in inhabited areas
- Removes mold, mildew, food odors, paint odors, and smoke odors
- For use in fire and flood damage restoration, hospitals, nursing homes, day care centers, etc.
- Technology certified by NASA and FDA as a Type 2 medical device
- Washable filters

## Dehumidifier

RW-29 is a high-capacity dehumidifier designed for use in commercial and industrial settings. ## Chuck's Advise

Tent cleaning for vinyl tents involves a few effective techniques.

- Start by spreading the tent on a clean, smooth surface and use SHIPP TENT CLEANER, diluted 1:10 for heavy dirt and 1:30 for lighter films.
- Apply the cleaner generously to dry fabric, allowing it to sit for a minute before cleaning.
- For mildew stains, dilute Blitz (1:10) and rinse thoroughly afterward.
