

# FIREWORK EFFECT CHART

Here is a visual representation of the many effects' fireworks have to offer. Feel free to use this chart online when choosing products or print it off and bring it with you when visiting our location.

|                                                                                                    |                                                                                                                      |                                                                                                                        |                                                                                                         |                                                                                                    |
|----------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|
|                   |                                     |                                       |                      |                                                                                                    |
| <p><b>Brocade</b><br/>Effect of woven gold clusters bound together within a star burst</p>         | <p><b>Bouquet</b><br/>A bouquet pattern is a floral-shaped aerial pattern of stars, usually in a spherical shape</p> | <p><b>Comet</b><br/>A star or other projectile which leaves a glittering persistent trail</p>                          | <p><b>Chrysanthemum</b><br/>Perfectly spherical burst of tailed stars like the flower it represents</p> |                                                                                                    |
|                  |                                    |                                      |                      |                |
| <p><b>Glitter</b><br/>Constant spray of strobing glitter effect usually in cones and fountains</p> | <p><b>Dahlia</b><br/>Produces a starfish like shape. Fewer but larger stars than Peony</p>                           | <p><b>Stars</b><br/>Glowing flaming ball of colored light or colorless crackle that can rise on their own or burst</p> | <p><b>Palm</b><br/>Bright arms of cascading long lasting starts like the tree it represents</p>         | <p><b>Crackle</b><br/>Sounds like hundred of snaps or crackles with an aerial gold lace visual</p> |
|                 |                                   |                                     |                     |               |
| <p><b>Peony</b><br/>Perfect expanding sphere to stars that usually change color as they burst</p>  | <p><b>Pistil</b><br/>Central effect palm like can be added to peony or chrys. for bigger impact</p>                  | <p><b>Whistle</b><br/>Makes sharp howling sound. Can be found in rockets, fountains, cakes</p>                         | <p><b>Fish</b><br/>Preceded by tracer star they wriggle and swim away from the center</p>               | <p><b>Spinner</b><br/>Accompanied by a whirling sound as stars spin and whirl</p>                  |
|                 |                                   |                                    |                    |                                                                                                    |
| <p><b>Pearls</b><br/>Glowing stars that silently rise, do not leave a trail &amp; dissolve</p>     | <p><b>Willow</b><br/>Star bursts fall and gently drift down. Also 'falling leaves'</p>                               | <p><b>Crossette</b><br/>Set of stars that split into 4 or 5 stars and leave a trail</p>                                | <p><b>Strobe</b><br/>Flickers and flashes like a gallery of light blubs</p>                             |                                                                                                    |
