Tyrosys Corp Service Consent:

The person dropping off the equipment and the owner of the equipment authorizes Tyrosys to diagnose and service the above listed equipment.

Carry-in service labor performed at a base hourly rate of \$87.00 dollars per hour. At a minimum, a Diagnostic Evaluation Fee will be due for troubleshooting your equipment, and pre-payment is required for all suspected liquid spill units or other special circumstances.

Any equipment left beyond 30 calendar days from drop-off date will be considered abandoned and will be liquidated or destroyed.

All services are performed in our laboratory by Tyrosys staffed Apple Certified and Apple Authorized Technicians.

Manufacturer hardware warranties including AppleCare do not reimburse Tyrosys for the labor of evaluating, troubleshooting, and freight to transport your equipment, therefore diagnostic fees and applicable transit fees will apply. Software troubleshooting or repair, data recovery, and iOS unlocking are not covered by any warranty and are always billable services. Hardware and accessories sales are final and are exchangeable only within 3 business days of purchase.

Tyrosys Corp assumes no responsibility for data or data lost during servicing. It is the owners responsibility to backup important data prior to repair service release. Your original failed hard drive will not be returned to you if replaced and returned under warranty because it must be returned to the manufacturer. If the Hard disk drive or solid state drive is replaced outside of warranty, the original hard disk drive will be returned to the owner.

Customer release signature is required for Tyrosys to service your equipment. \_\_\_\_\_

Important -- Your Signature Required for Service
