

# CAPABILITY STATEMENT

Based in Gladstone, **Jcrew Engineering and Maintenance** provides a comprehensive range of boiler-making services. We offer large work scopes both in our workshop and on-site to mining companies, smelters and refineries. We are a provider of high-quality construction, machining fabrication and maintenance work and take pride in allowing quick turn-around times, whilst giving an OEM standard.

## Our services include:

- Workshop Welding and Fabrication
- Diesel filters and Mechanical filters
- 24/7 Breakdown support
- Down days, labour support and shutdowns
- Welding trailer hire and equipment
- Off site lineboring and machining
- Structural repairs
- Sandblasting and Painting
- Heat treatment
- Confined space equipment

With workshop facilities and mobile field welding trailers, equipment and Vehicles, Jcrew Engineering can carry out a range of weld repairs, fabrications and engineered works. Our hard working and qualified team strive to achieve the best outcome for all clients and take on any job we specialise in. Jcrew Engineering and maintenance are always looking forward to new opportunities and working with others.
