Digitize asset inspection process

- A client from Europe engaged Verdeyu to digitize their asset inspection process for under construction and operational wind and solar assets that provide not only real time reporting on the status of the fleet, but also enables to streamline data gathering and reduce costs
- Verdeyu worked with the client to streamline the asset maintenance process by developing an RPA based mobile application that can:
 - Leverage exiting templates (for wind & solar assets)
 - Automatically generate check lists on demand
 - Scheduling
 - Contracting
 - Monitoring, tracking and reporting
 - Asset health analytics
 - Connection to existing DB

Key Features

- ✓ Custom checklists
- ✓ Automated reporting
- ✓ Data analytics
- ✓ Asset health reports
- ✓ Connected ecosystem
- ✓ Integrated operations
- ✓ Mobile enabled
- ✓ Cloud platform
