

Green Automation

www.VerdeYu.co

Digital platform for solar data analytics

- Verdeyu was contacted by a solar asset owner with numerous assets in Southeast Asia to assist with automating their manual data management. Manual data handling is always susceptible to occasional mistakes that cost time and money.
- The platform was developed leveraging existing solutions and integrated with the in-house processes in order to provide a platform that can
 - Tailored KPIs for effective data management
 - Automated data visualization
 - Easy access to cleansed data
 - Automatic report generation
 - Reduced data interpretation errors
 - Monitor system performance with ease
 - Innovative data automation methods.
 - Analysis & data segmentation
