

HYDRAULIC FLANGE / WEDGE SPREADER

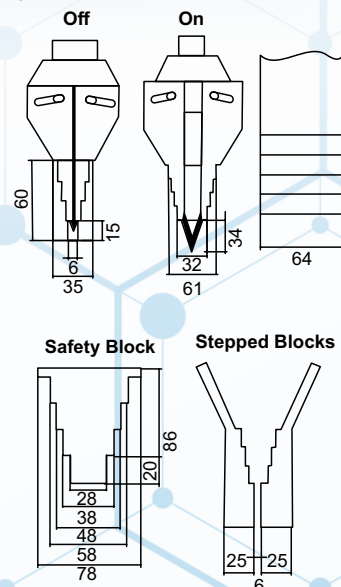

Features/Application

- For maintenance, commissioning, shutdowns, testing and valve change outs.
- Unique interlocking wedge design - no first step bending and risk of slipping out of joint
- Requires very small access gap of only 6 mm
- The hydraulic flange spreader is available as set (pump, tool, gauge, gauge adaptor, couplers and hose).

Safety Block

Stepped Blocks

(All Dimensions are in mm)

Carrying Case (Optional)

Open Position

With Stepped Blocks

Full Set in Assembled Condition
