

Occupational Security

A practical readiness model that turns emergency plans into measurable performance.

Stonebridge Strategic helps organizations reduce preventable harm and operational disruption by building role-based readiness across reporting, first-minutes response, and recovery.

What We Solve

Most organizations have policies. The gaps that drive harm and downtime are execution gaps:

- Alerts are delayed or unclear
- Roles and decision authority are ambiguous
- Accountability is improvised
- Reporting and triage are inconsistent
- Recovery lacks controlled re-entry and closed corrective actions

The Model

Prevent: trusted reporting, triage criteria, early intervention coordination

Protect: first-minutes actions, role clarity, communications, accountability

Recover: controlled re-entry, documentation discipline, AARs and improvement closure

What You Get

Practical artifacts your team can use immediately, such as:

- First-minutes checklists and role cards
- Alert templates and 911 call script/checklist
- Accountability method guidance (primary + fallback)

- Controlled re-entry checklist
- Tabletop exercise package + evaluation criteria
- After-action report and improvement plan tracker
- Governance map (who owns what) and readiness metrics

Engagement Options

1) Readiness Assessment + Roadmap

Validate current plans and training, identify gaps, prioritize quick wins.

2) Training + Tabletop Exercise

Role-based training followed by a realistic tabletop and after-action improvement plan.

3) Program Sustainment

Governance, cadence, metrics, and multi-site scaling for long-term readiness.

Who This Is For

Security, EHS, HR, Facilities, Operations, and leadership teams that want:

- Faster first-minutes response
- Less downtime and cleaner recovery
- Defensible duty-of-care controls
- Measurable improvement over time

Next Step

Request the full Occupational Security white paper (45 pages) or schedule a short Readiness Scorecard Review.
