

NOTICE TO THE GENERAL PUBLIC

WARNING!

Why are we protesting against Mayor Bowser?

She looks the other way after promising to get D.C. residents, including returning citizens, on the job. Whether it is by way of our largest infrastructure projects or by creating incentives to attract and retain businesses. And, she also promised to ensure that our small businesses are given a fair shot to compete for work on city funded development projects.

Mayor Bowser often affirms that, "Small businesses are the engine that drives our local economy and when they thrive, so does our community".

The Mayor has not kept her promises! In FACT she has done the complete opposite by:

1. Allowing unlicensed companies from other states to work in D.C. and they are not paying taxes after 14 years of violating the law.
2. D.C. companies working on District projects had their business go down from 85% to 5% and in some cases from 90% to ZERO and OUT OF BUSINESS!
3. D.C.'s Certified Business Enterprise's (CBE's) are not getting paid from D.C. Government funded projects in accordance with the law.
4. Unlicensed companies took jobs from District residents and returning citizens.
5. Small businesses who speak out have been harassed and or retaliated against.

Total Disrespect of Gotta-GoNow.com and Small Businesses operating in the District of Columbia.

April 19th, 2019. The Mayor, Administration Officials, City Council Members, and DC Events were notified via email & phone once again about the continued use of unlicensed illegal companies doing business on city projects.

That same day 200 Portable Toilets from Don's Johns a company not licensed to do business in D.C. were at RFK Stadium for Cannabis Fest which is Federal Land. Attendees were openly smoking marijuana. This is the same land in which Congresswoman Eleanor Holmes Norton is currently lobbying to turn over ownership to the District.
