

# Making the Right Choice

**What to consider when choosing the school that is right for your student**

When thinking about cost, remember to make sure you've completed the FAFSA to ensure you take advantage of financial aid opportunities.

Research all of the colleges you're applying to. What are they looking for in their students? See if their students score high on standardized tests.

When researching schools, see what programs of study they offer. Do they have what you're looking for? And what kind of support do they offer students who aren't sure what they want to study?

What kind of support does the college provide for students? Do they have programs for migrant students, first-generation students, or support for specific majors?
