COMPANY PRESENTATION

Solutions for corrugated products

E-commerce revolution
NEW PERSPECTIVE

Changes in society, culture, economy and especially "web and digital technologies" are generating new outlooks in various market sectors.

The corrugated packaging market, in particular, is growing quickly, helped by the explosion of **e-commerce** and developments in digital printing technologies. E-commerce retail sales are continuing to rocket, with estimates of around 37% annual growth in e-commerce trade in Europe.

Emerging trends including sustainable packaging and aesthetic packaging will continue to promote the development of the **corrugated packaging industry**.

This will have a profound impact on packaging demand, especially in the corrugated industry as it represents 80% of demand in e-commerce.

We dedicate to this approach in our style of manufacturing, in our unique converting solutions, in order to **supply superior packaging solutions that are innovative, sustainable and user-friendly**.
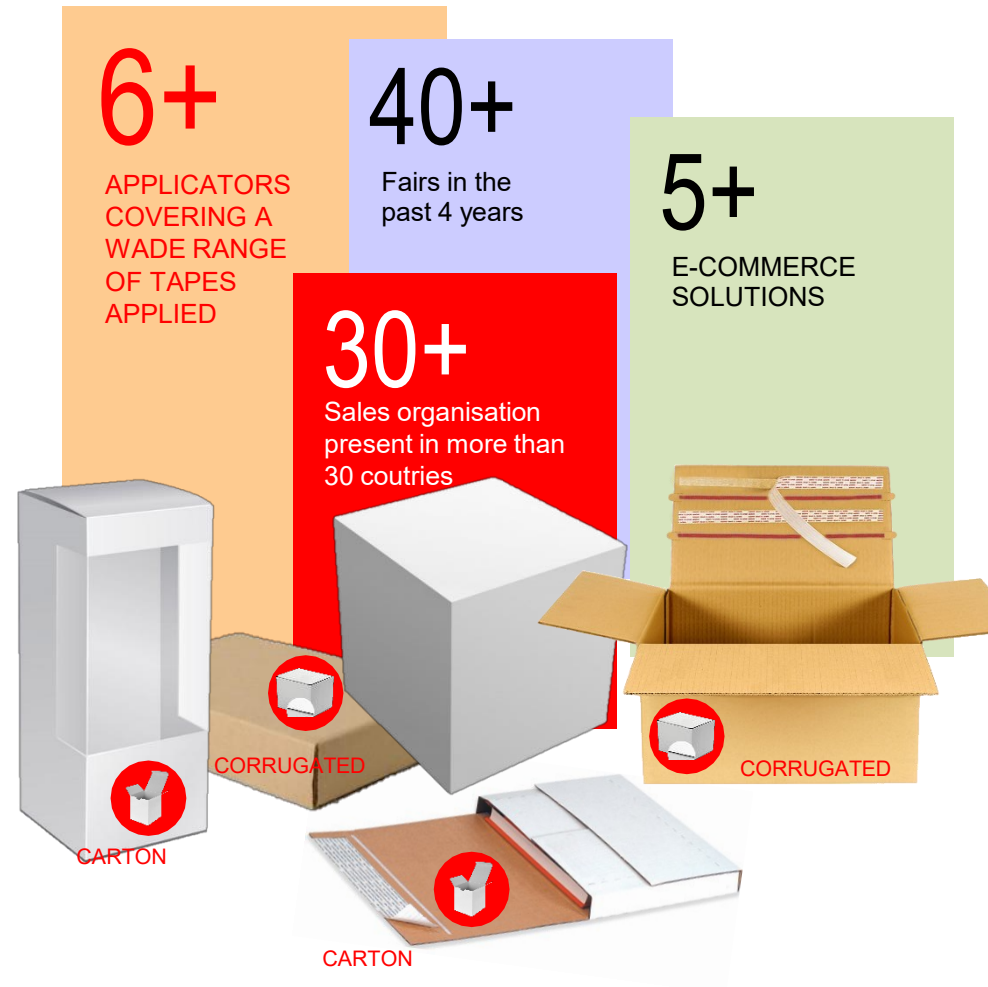

WHO WE ARE

APR Solutions is a fast-growing company established in 2015, by its founders with more than 20 years experience in finishing equipment.

APR Solutions has concentrated on developing and manufacturing machines specialized for the corrugated packaging industry, as its one of the fastest growing market sectors, with a special focus on the **e-commerce** products.

Our global headquarter located in Rondissone, **Italy** incorporates advanced engineering and research departments, in addition to a sophisticated machine shop for the production and assembly of our equipment and accessories,

With our own design and manufacturing capabilities we are also able to tailor machines specifically to a customer's requirements.

OUR SOLUTIONS
FOR YOUR INDUSTRY

APR Solutions offers a range of solutions offered, designed for this sector, innovative solutions for the creation of packaging dedicated to the world of e-commerce.

With the continuous development and expansion of the world of online sales, packaging suitable for this sector becomes a primary need to be satisfied.

Siliconized tape, double-sided and tear-tape application

Fold and glue

OUR SOLUTIONS
FOR YOUR INDUSTRY

The APR Solutions provides **complete solutions for the application of several types of double side tape and tear strips**, in a full automatic way, including:

- Tissue tape
- PVC tape
- Banner tape
- Acrylic tape
- Transfer tape
- Foam tape up to 3mm
- VHB tape (automotive)

Our highly productive machinery can apply tape on a wide range of supports, with regular and irregular shapes, such as:

- Paper
- corrugated cardboard (flute type E, B, C, A, BC)
- Carton
- Acrylic
- PVC, plastic, polypropylene,
- wood
- aluminum

The market, your products, our machinery

The pressure on time to market will increase drastically in every step of the packaging production process.

At the same time, the enormous performance of the machines/production lines meets the increasingly complex customer requests **for modern and cost-effective compact size gluing and tape machine for silicon tape and other types of tape application in the E-commerce field**.

Knowledge and experience of qualified staff, in combination with latest designing tools, assembling procedures and modern, highly-specialized mechanical department, enables us to **create innovative machines with simple operation, short set-up times, high quality standards and modern design**.

By delivering support close to its customers, in their language and with respect to their customs, APR helps customers achieve higher quality, improved productivity and reduced operating costs.

By constantly reviewing every element of every machine at APR Solutions, we are able to hone performance further and further through retrofit upgrades and new, more productive versions of existing products and constantly advancing what can be achieved using this inline process.
