

Dorset Youth COP

13 November 2026

**Coastland College:
Kingston Maurward Campus**

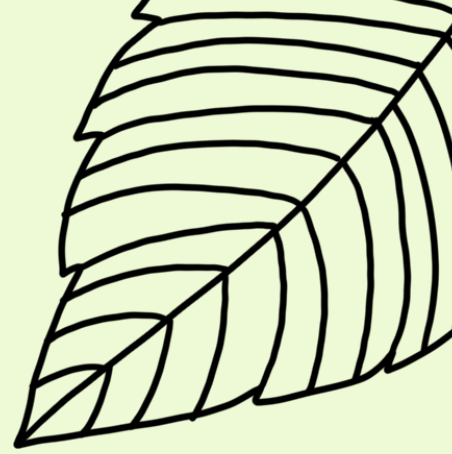

We're excited to welcome you to the first Dorset Youth COP

Plan for the day

- 9:30 - Welcome
- 10:00 - Workshop session 1
- 11:00 - Workshop session 2
- 12.00 - Workshop session 3
- 12:45 - Lunch
- 13:20 - Green Careers session
- 14.20 - Closing session
- 14.30 - Travel home

Aim of the day:

- Come together to talk about our environment
- Share how you feel about environmental issues impacting nature and our climate
- Feel inspired to take action for nature, climate and other environmental issues

After a welcome to the day you'll move round three workshop sessions before coming together to hear about a wide range of 'green' jobs.

Workshops

Everyone will move round the following three workshops which last for 45mins (plus time to move to the next session and a brief comfort break):

What Happens Next? Exploring Environmental Issues, Emotions & Action

Sally Palmer (Senior Lecturer in Psychology and Education at the University of Exeter, who researches how psychology can influence our understanding of environmental issues)

Take part in a team-based game exploring what happens when communities face environmental challenges. You'll be given different situations, perspectives and circumstances and asked to work out what might happen next. Along the way, you'll explore how things like money, community support, decision-making, inequality and opportunities to work together can shape what people are able to do, as well as how emotions such as worry, anxiety, hope and empowerment might influence responses to environmental issues. There's no single "right" answer; the challenge is to use the information you're given, work together and explain why you think a particular outcome is likely.

Mad to Magic: Future Rebels 2040

Rachel Pearson (The What If Department)

Using LEGO SERIOUS PLAY methodology, you'll use imagination and storytelling to investigate the systems that shape our lives: housing, food, transport, business, leisure and tech.

FRUSTRATION: Spot the problems:

You'll explore the madness of your world today. Get it out in bricks, name it.

TIME TRAVEL: Shaped perspectives.

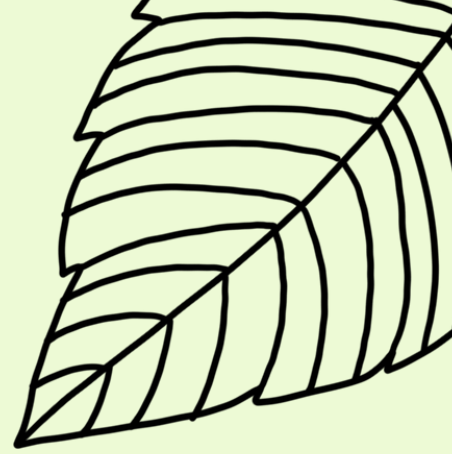

Using AI-generated future scenarios, you'll sprint-learn what's real elsewhere already, what's coming and what's possible.

FUTURE BUILDER: Shift the system:

You'll build what's in your imagination to suggest solutions for 2040.

Creativity usually flows and all builds are valuable.

The session then shifts from problems to possibilities. Through a series of rapid "changemaker" builds, you'll explore what you love, what you want more of, and the ideas you'll have to make the world better. The power of play unlocks deeper engagement, creativity and collaboration, helping you to develop systems thinking, communication and solution-focused problem-solving skills.

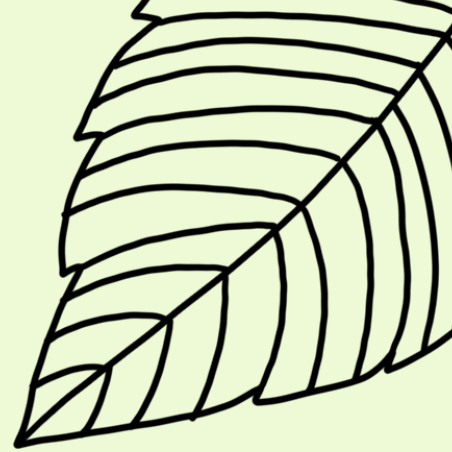

Nature's Heroes

Sophie Pain (Dorset Local Nature Partnership)

This workshop focuses on thinking about taking action to support our habitats and species in nature through creativity. Firstly, you'll think about what wildlife and habitats in Dorset need and then you'll design your hero – it could be a superhero or someone like David Attenborough – drawing or highlighting what skills they'll need to have to take action.

Once you have your hero and the actions they might need to take, You'll either draw / write a storyboard about them, like a comic book, describing and showing their missions; or write a blog or poem that describes who they are, what habitats and species they're helping.

We'll be sharing some of your amazing creations from the three workshops at the Dorset COP (<https://dorsetcop.info/>) on Saturday 14 November and with you after the event.

Careers Panel

This session will be led by Laura Baldwin (Olympic Sailor and climate advocate)

The session will be split into two panels of people working within the 'green' and 'blue' sectors.

Laura will ask the panels some questions to understand everyone's roles and then you'll have an opportunity to ask questions.

We have confirmed speakers cover the following roles (subject to changes on the day) and have invited some others:

- Sustainable construction
- Eco gardening
- Renewable Energy
- Regenerative agriculture
- Data analysis
- Fast fashion
- Sustainable Business
- Sustainability
- Practical conservation / ecology
- Dorset member of Youth Parliament

End of the Day

We'll then end the day and hope you'll have a greater understanding of what we need to do to support our nature and climate in Dorset and be inspired to take action.

If you have any queries please email:
