

## Introduction to **BLOOM REVOLUTION** Mobile

Good morning, everyone and you, too Facebook. It is so great to be here today not only as a guest speaker but as an old friend you haven't seen in a while. Lots of things have changed here for the better thanks to a lot of work by all of you. I know great things will come from here. That leads me to what I want to talk about today.

Today I want to introduce you to a challenge...being a new commitment, with a new intention reaching a new possibility. The name of this commitment is called **Bloom Revolution**. It may not be what you think. So, without further ado, let's begin.

The curiosity of how the Universe works started my passion for study of metaphysics. This passion has leveled off to the study of consciousness. In fact,

consciousness was one of the main reasons I attended Holmes Institute. As of today, I think there is one pioneer that outshines them all when it comes to consciousness. I consider him to be the top in this field, the late Dr. David Hawkins. He made many incredible breakthroughs from his discoveries on this subject of consciousness. In his monumental book; *The Map of Consciousness* paved the way for much of our new understandings about the nature of consciousness. In that book he challenges us; (I quote) *“Understanding the nature of consciousness is the most important subject of all subjects to be learned because it underlies all human experience and enterprise. Science can advance no further without understanding it.”*

Mobile, He knows something that we don't. This is why I am here. His research and discoveries along with many other scientists and mystics have inspired me to present and challenge **everyone** to take a new and necessary responsibility for their thoughts and actions by using **Bloom Revolution** as the startup plan for raising

consciousness. Now we can do something about our environment. Now we can participate and change the transformation of this planet to **our good** because we have a new understanding how to do it that was never possible before. It was just in the last 10 years or less that solving this dilemma was actually possible yet alone even doable. Use love as the answer to this crossroad we are being asked to do. We've all heard we must LOVE one another. That isn't a new command. But now we understand **why** the **energy** of love plays such an important part in the **security** of our planet because now we have the science to back up these new claims. By using **Bloom Revolution**, we will have an ongoing plan to forward this SHIFT to allow a higher consciousness to keep occurring.

Science and spirituality have definitely now come together. Our progress in the last 100 years in technology has been amazing but our progress spiritually is being

threatened. We no longer can be blind to the part science plays in our spirituality anymore. **I also ask that you consider me a bridge between science and spirituality.**

We are seeing change all over this planet **but I ask you...Do you think this kind of change will serve all of us for a safer and better life?** I can tell you according to Dr. Hawkins map of consciousness.... we are on the borderline. Knowing that.... if our lives are not headed in a positive direction, **what can we do about it** if it isn't?

Many scientists and spiritual leaders are asking us to make a **Shift**. They claim we are at a crossroads or a tipping point and it is time for us to choose. But how do we do that? Anyone can ask us to change. Anyone can ask us to choose. But changing and choosing who, what, when, where, or how?

So, this leads us to the big question.....

**How do we transform our world to make this SHIFT happen?**

**Bloom Revolution** is about a plan that allows us to understand and shift to a higher consciousness with continued progress.

In Landmark Education, if you want to start real change even on a global level, you must start by creating a **new possibility**, along with a **new intention**, and finally a **goal** agreed upon all the players with all the actions they will do.

So, our new **goal** is “**Life is good and love surrounds us as we live in a high consciousness that supports a world that works for everyone.**”

The **new possibility** is the possibility of having a **beautiful life** where Peace, Love, and Prosperity flows for all living things.

Sounds good?

What could be a **possible symbol** that will be easy for all of us to remember the possibility, intention, and goal?

## A BLOOM

A Bloom is a beautiful reflection of the creative handywork of God. Every flower is **lovely** when we give them as gifts on any special occasion. It doesn't matter if you give them or receive them, you will always be lifted up by their presence. In every circumstance, they connect us to each other sometimes without saying a word. This connection and intention creates love, kindness, support, hope, compassion, and even forgiveness to name a few. Flowers connect us with their beauty and presence and love leads the way like nothing else can do.

With that in mind.... What if **we** took the **flower/bloom** as a symbol of each one of us forwarding this shift? Then we apply **love** as the energetic transformative **push** to always shift us to our goal and possibility? We can raise consciousness when we **purposely** use our thoughts and emotions to change ourselves. Remember, **we are not**

**separate from anything.** You see your efforts will always count. By remembering that our **hearts and our minds** are key, we can have and direct a beautiful life for all of us just by **being** the gift of love.

Now...imagine a world that you truly want to live in. We must have our goal in mind for us to reach it. If you don't have a goal then how will you know when you get there? **Imagine**, safety, security, no victims, no ego, and peace all working together for our good.... everyone's good. Sounds like paradise, doesn't it? Heaven right here on Earth. It is reachable and doable if we have enough people to agree to the new possibility and our new intention. Yes, there will be lots of people that will never consider Bloom Revolution. I am well aware of this. I am speaking to the ones that can hear my request. **We can be the answer and the perfect catalyst to transform this planet by just understanding the nature of consciousness and using it to our benefit.** But to get

there, we have to make changes within **ourselves** in order to fulfill our new goal. These changes within us are about **the Bloom Revolution**. Choosing LOVE as the new reason to raise consciousness will start an endless domino effect. This is the nature of consciousness. It gets stronger with the energy that feeds it. Love is always the strongest energy. The tipping point will never come without our understanding of this. If we continually support the goal, life as we know it will suddenly change and we may not realize it. The SHIFT will just happen and our goal will be realized.

The idea of a **BLOOM** came easily for me. I have had a lifelong love affair with flowers since early childhood. Flowers always touch, move, and inspire me with their beauty. They are truly a gift from God. With that in mind, why don't **we** take on that inspiration we get from

flowers and **we** become the **BLOOM**. We become the inspired gift from God!

The dictionary defines “**bloom**” many ways but here are the 2 definitions that agree with the **BLOOM**

**REVOLUTION:**

- A state or time of high development
- To mature into one’s potential

Do you see where we are headed, now? The **BLOOM** now represents **us** reaching a state of high development as we mature into our highest potential.

**BLOOMING BECOMES OUR NEW INTENTION!!!!**

**The intention is for us to reach our highest potential by developing our true nature...LOVE.**

Our job is to give and create beauty just as the flowers do...by sharing ourselves. **Sharing yourself is the**

**highest form of creativity.** It sounds simple but if everyone could do it, we wouldn't be at this crossroad. We are in this situation because our consciousness is at a tipping point and it is our thoughts and actions that can either raise or lower the outcomes.

Let's refer back to **Dr Hawkins again.** He challenges us and I quote (pg. 27), *“If we are motivated by love and love is what moves us, then everything we touch and everywhere we go and everyone we meet will be made better because of what we have become as a loving person. Love is the silent **power that inspires, heals, uplifts, encourages, and improves everything.** To love any single piece of life is to love all life, for everything is interconnected.”* **Repeat**

Isn't this a formula of love? We can change ourselves with our new intention to raise our consciousness so that everyone can experience a beautiful life we all desire.

Ernest Holmes even reminds us of our nature. In his book, *It's Up to You*, he says, “*We can't help but create. A person who doesn't love something, a person who isn't happy, a person who isn't loved and doesn't make others happy, and others don't make him happy, is unexpressed. There is a desire in us to love and be happy, to give, to receive; back of it all, a necessity to create.*” Right, there is proof enough we all have it in our nature to be the flower. Clearly, we have this “urge” within us to love. It is our Divine nature. The ego is not. That energy is a part of us that we will struggle with. Later, we will learn how to recognize this ego-energy in order to finally let go of it. The beautiful life we are imagining is achievable once we know who the players are.

## **WHO are the players?**

The dominant and only player to make this shift is **you**. Only you can change yourself. “**You**” means all the incomplete parts of you, the loving parts of you, the

developed ego of you, and all your surroundings within you all trying to manage life with or without cause.

**To distinguish this is the one key to raising your consciousness.** REPEAT It takes a trained mind that is aware what is going on and lots of patience and forgiveness to reach our goal. It won't happen overnight.

It takes your **focus** with your **new intention** to choose **Love** rather than being right or being forceful. A good definition of love is this: Love does not come from the mind; it comes from the heart as a forgiving, nurturing, and supportive **WAY OF BEING** in the world. Love always **expands** and has an **uplifting** effect. Animals as well as people feel better just by being around you.

We all know people like this and how good it feels to be in their presence. These people activate a higher energy that activates us. They are our blooms. Think about the blooms in your life. I have had hundreds of them. **This is**

what I am asking you to do. My request is to remember you are the **new potential** to be a bloom in anybody's life.... Raising consciousness in Mobile, Alabama is yours to do. When you **change** the way, you react or respond in a difficult situation and choose love as your new intention, that creates a new potential to transform anything. Let's not worry about the world, the world will take care of itself.....

Our new intention includes anything that is alive such as plants, animals, and even our beautiful Planet, Earth.

Your new intention fulfills itself by allowing God pick the place so you pick the opportunity. You can start with our immediate family and friends and then build up to your work place and/or school. All you do is remember the intention and use yourself as the conduit for love and your immediate world will take care of itself. Why would the world change if you don't?

**Now we have come to the most important question.**

**What is at stake?** This is another reason why I am here.

It is to make you aware what is at stake. What is at stake

is humanity, our species, everything in our world is what

is at stake. Our progress is being shaken because our

consciousness is at a dangerous level. This level

represents who we **are being** on this Planet. **If who we**

**are being caused this problem, then who we are being**

**can solve this problem.** Our new possibility now

depends on you and me to **consciously** use Divine love to

shift us to our new goal. That's the **new way of being.**

We can do this by remembering **BLOOM**

**REVOLUTION.** I am not talking about a fight or

something in a revolution or a planet circulating around a

sun.... I am using another definition that is perfectly

suited for the word revolution. The word, **Revolution** is

also defined as: *“An activity or movement designed to*

*effect a fundamental change in the way you think about*

*something.*” That **something** is you, my friends. It's the

way you think about yourself and your relationship with others. It is a **crucial part** of the shift we must address. This revolution is not about **our** fight for humanity really...**It's about US changing ourselves in order for humanity to change!!!** We must change ourselves...not anyone else...in order to make this SHIFT happen.

## **How do we do that? Bloom Revolution**

Let's recap:

1. I am asking all of you (Mobile and Facebook) to participate in the possibility of a beautiful life by being the bloom in people's lives.
2. With your new commitment to transform this planet, you now become a part of the solution instead of the problem.
3. Your new intention is to reach your highest potential by developing your Divine nature. (love)
4. There will be no competition or struggle with anyone.

The only player in this revolution is **you** and the only

struggle you will realize is the one within you from the choices and judgments you make.

5. What is at stake is our humanity, the quality of our life, our children's lives and their children's', and so on. Life is our creation and most of us were unaware of our participation in creation. Now, thanks to Science, we are no longer clueless. We know we can create and experience the beautiful life we have imagined by using love as the energy to do it.

Finally, Science and Spirit are ONE.

6. We are the solution!

7. Love is the answer.

Today was your introduction to Bloom Revolution. Please all of you join me next week, here, and we will talk more in detail about the Beautiful Life.

**I hope you will** never look at a flower the same way again!

We have bookmarkers as a gift for you today. My website and other pertinent information are on it if you have any questions.
