Work Experience

Residential Interior Work

My journey in interior design began in 2012 with my first project in Thane. Starting from Belapur, Navi Mumbai, we completed just 3 projects in our first year—small steps filled with challenges but ultimately rewarding. The second year brought only 2 projects, but by 2015, the numbers steadily grew to 5, then 10, and eventually 20 projects annually. Even during the pandemic, our work continued locally. By 2024, we had successfully completed 150+ projects, each taking months to perfect. Now, in 2025, we've started with 3 exciting projects and aim to surpass 50 this year. Every project reflects our commitment, and the journey continues!

Commercial Interior Work

The interior business started in 2012 but we started commercial projects in 2015 from a relative's office and from there commercial projects started and 4 projects in 2016, 3 in 2017 and

6 in 2018 and till now we have also done commercial projects and projects of restaurants, cafes and shops; till now we have done 60+ commercial projects and this year in 2025, we have started with commercial projects.
