All driveways must have a working culvert. All new driveways must have a working culvert of no less than twelve (12) inches, unless approved by the Lake and Property Maintenance and Improvement Committee.

B. Building Requirements

All residences must have a minimum of five hundred seventy-six (576) square feet of living space (excluding decks).

- Eight by sixteen (8" X 16") footings to be at least thirty (30) inches below grade and on solid ground.
- Piers with flared footings (24" X 24") not over five feet (5') on center and made of concrete or commercial blocks.
- Floor joists 2" X 8", sixteen inch (16") on center on spans to twelve feet (12') or trusses two feet (2') on center, with three quarter inch (3/4") tongue and grooved plywood subfloor.
- Floor joists 2" X 10", sixteen inches (16") on center on spans more than twelve feet (12') or trusses two feet (2') on center, with three quarter (3/4") tongue and groove plywood subfloor.
- All external wall studs 2" X 6", sixteen inches (16") on center with double top and single bottom plate.
- Ceiling joists 2" X 6", not over two feet (2') on center or trusses.

C. Septic Systems

Septic systems are to be registered with Grundy County and inspected by such, before connecting to the home. They must be installed or inspected by a contractor that is licensed by the State of Missouri, and must be photographed before covering laterals, distribution box and septic tank. Photographs of the system must be placed in the lot file with Leisure Lake Association, in the Association office. Septic tanks constructed of metal are not legal in the state of Missouri. Sizing of septic tanks as adopted by the State of Missouri; 1 to 3 bedroom homes – 1,000 gallon, 4 bedroom homes – 1,250 gallon, 5 bedroom homes – 1,500 gallon.

- Number of feet of lateral field is determined by percolation testing of the soil where the system is installed.
- In the event a percolation test is not performed for engineering the lateral system, the Department of Health has a sewage standard.
- An excerpt from the DOH sewage standards manual, a single-family home produces 120 gallons per day per bedroom. So 120 gallons per day per bedroom x 3 bedrooms = 360 gallons per day flow.
- From the DOH manual, the soil described above has an allowable application rate of 0.3 gallons per day per square foot of absorption field.
- $360 \text{ gallons per day} \div 0.3 \text{ gallons per day per square foot} = 1,200 \text{ square feet of absorption area.}$
- $1,200 \text{ square feet} \div 2 \text{ feet in width} = 600 \text{ lineal feet of trench.}$
- Laterals cannot exceed 100 feet in length, so
 $600 \text{ lineal feet} \div 100 \text{ lineal feet per trench} = 6 \text{ trenches needed.}$

Federal law restricts septic tanks and lateral fields to be installed no closer than; 50 feet from waterways and lakes; 15 feet from building foundations; 10 feet from adjacent property lines. On Lake Front Lots and lots with creeks flowing into the lake, the minimum setback for septic tanks and lateral fields is 50 feet from nearest edge of waterway, and 10 feet from the roadway. The Building Committee or the Secretary shall be notified before construction is started, when the inspection is scheduled to take place and when construction is completed.

D. Docks and Boat Houses

The construction of fishing docks and boat houses are subject to inspection by the building committee, and shall be secured to a fixed location along the property owner's lot, but not within the five foot (5') easement of the side lot lines. The use of white Styrofoam, plastic or metal barrels is prohibited.

Section III. Mobile and Modular Homes

- Foundations shall meet manufacturer's requirements for newer homes. On older homes, piers under "I" beam shall not be over ten feet (10') apart on mobile Homes twelve feet (12') or less in width; not over eight feet (8') apart on those over twelve feet (12') in width.
- Footings for piers shall be below frost line, thirty inches (30") minimum and must be at least down to original ground, and shall be eight inches by sixteen inches (8" x 16") or more in size. Piers not over forty inches (40") high may be stacked cement blocks laid holes up. If over forty inches (40") in height, they must be double stacked blocks laid in mortar, cross laid.
- Overhand from the last pier to the end of the unit shall not exceed two (2) feet.
- Shims shall be used as required for final leveling.

The following is an excerpt from the Grundy County web site that sets the minimum requirements for septic systems; Review and Complete

Septic systems are to be registered with Grundy County and inspected by such, before connecting to the home, or installed by a contractor that is licensed by Grundy County.

Septic tanks constructed of metal are not legal in the state of Missouri.

Sizing of septic tanks as adopted by the State of Missouri;

1 to 3 bedroom homes.....1000 gallon

4 bedroom homes.....1250 gallon

5 bedroom homes.....1500 gallon

Number of feet of lateral field is determined by percolation testing of the soil where the system is installed. If a percolation test is not done to engineer the appropriate size for the lateral system, refer to the Department of Health sewage standards manual.

- From the DOH sewage standards manual, a single-family home produces 120 gallons per day per bedroom. So 120 gallons per day per bedroom x 3 bedrooms = 360 gallons per day flow.
- From the DOH manual, the soil described above has an allowable application rate of 0.3 gallons per day per square foot of absorption field.
- 360 gallons per day ÷ 0.3 gallons per day per square feet = 1,200 square feet of absorption area.
- 1,200 square feet ÷ 2 feet. width = 600 lineal feet of trench.
- Laterals cannot exceed 100 feet in length, so
600 lineal feet ÷ 100 lineal feet per trench = 6 trenches needed.

Federal law restricts septic tanks and lateral fields to be installed no closer than;

50 feet from waterways and lakes

15 feet from building foundations

10 feet from adjacent property lines

Capacity of Tank (refer to table above) _____

Total Length of Laterals (Min 200ft per bedroom unless engineered otherwise) _____

On Lake Front Lots and lots with creeks flowing into the lake, the minimum setback for septic tanks and lateral fields is 50 feet from nearest edge of waterway, and 10 feet from the roadway.

Include dimensioned sketch of septic tank and lateral field with this application.

The Building Committee or the Secretary shall be notified before construction is started and when construction is completed. **Photographs must be taken and filed at the Leisure Lake Association office before covering the lateral field, distribution box or septic tank.** Not photographing and filing your septic system will result in notification to the Grundy County Health Department and/or the State of Missouri.
