

**WHY PAY MORE  
FOR LESS?**

EPA Reg. No. 80518-2

Manufactured for Transgolf By:  
CytoTek Enterprises, Inc.  
Spring, TX 77373

Why pay more for less? Agra-Rouse offers **more root building power** per dollar than any other bio-stimulant on the market.

## BENEFITS OF AGRA-ROUSE

- Increased plant performance turgidity
- Enhanced nutrient uptake & utilization
- Improved stress resistance
- Increased vigor
- Improves salinity tolerance
- Increased yield
- Retards turf senescence
- Increased fertilizer efficiency
- Directs energy from the plant into the roots that yields deeper roots
- May prevent endovascular constriction that can limit the flow of sugars when used with PGR's
- Promotes early spring green-up
- Helps maintain sugar flow to the plant
- **EASY on the BUDGET**

## GREAT PRODUCTS CREATE GREAT SCENERY

- **RATES** for cool and warm season grasses:
- 4-8 ounces per acre per month.
- This can be a once per month application or bi-monthly, or weekly to achieve up to 4-8 ounces of product per acre in a month.
- This product is very compatible with primo, trimmit, and fertilizer.
- Do NOT mix with DMI fungicides and herbicides.

## KEITH WOOD, QUAIL HOLLOW CLUB

"I was introduced to AgraRouse a couple years ago as a supplement to our fertility program. After a few months of making light applications I began to see the effects as our turf started to tighten down and develop a thick root system. I like the fact that AgraRouse contains all three plant growth hormones but is concentrated so that our turf is better suited to build and store carbohydrates in the roots. Also, I really like mixing AgraRouse with Primo Maxx in the summer on our UltraDwarf Bermudagrass greens and think that the synergy between the two products is perfectly suited to create a tight upright canopy. AgraRouse has become a staple in my greens fertility program and I can't wait to find more uses for this product on other areas of the course."

## ACTIVE INGREDIENTS

Cytokinin, as Kinetin	0.05%
Gibberellic Acid (GA <sub>3</sub> )	0.05%
Indole-3-Butyric Acid (IBA)	0.09%
Other ingredients:	99.81%
<b>TOTAL:</b>	<b>100.00%</b>

## RALPH KEPPLER, CGCS, EAST LAKE GOLF CLUB

"Because The Tour Championship by Coca-Cola is held in late September, our MiniVerde greens enter the fall season mowed tight and heavily regulated. In 2010, after four weeks of virtually no growth and our wanting to raise our height-of-cut (HOC) for winter, George Frye recommended Agra-Rouse to help the plant begin growing again. Despite the cool weather of mid-October, the plants did respond, and we were able to increase our HOC to our desired level. Agra-Rouse also works well in the spring to "kick-start" the MiniVerde so we can begin to increase our density earlier in the season. Agra-Rouse has become an important part of my program."
