### GENERAL INFORMATION

**K-Mg** is a highly available liquid formulation of potassium and magnesium acetate. **K-Mg'S** low salt index and superior foliar absorption quickly increases nutrient levels in plants with minimal potential for burn, even at higher rates. **K-Mg'S** organic nature provides increased absorption of potassium and magnesium over other commonly used sources as well as increased plant safety at higher rates. **K-Mg** is especially effective during rapid growth periods, fruit development and sizing when potassium utilization is greatest.

**\*\* Use caution when tank mix pH goes below a pH of 6. A jar test is recommended to test compatibility when new or unfamiliar tank mix combinations are used. When used as directed this product does not supply all the nutrients required by plants and is designed to supplement a soil fertility plan.\*\***
