“Agra-Rouse has been a part of our plant growth program for over three years now. This product has proven to be a complete complement to all of our management practices on the golf course. We have found that applications of this product will yield an increased vertical density, root vigor, and durability of the canopy. Agra-Rouse has also proven effective in the enhancement of other fertilizer and plant growth products.”
Chris Johnson, Golf Course Superintendent, May River Golf Club
September 20, 2011

“Agra-Rouse is a great product. We sprayed Rouse on our Champion Greens on a Monday, and by Tuesday afternoon, the greens were unbelievable. The response was incredible. I am a firm believer in this product.”
Scott Fallon, Golf Course Superintendent, Bermuda Run Country Club
September 29, 2011

"We incorporated agra-Rouse into our spray program three years ago. Right away we could tell that the greens were putting faster and smoother. Our Champion greens now have a stronger root system and a tighter vertical putting surface. The greens are simply healthier. We love this product."
Bryan Barnard, Golf Course Superintendent, Cleghorn Country Club Plantation
November 4, 2011

“After using Agra-Rouse for only 6 weeks the root mass has nearly doubled in our Champion bermudagrass greens.”
“It has now been four months since I started spraying Agra-Rouse and my comfort level going into the winter with ultradwarf has grown significantly, due to the dense and lengthy roots Rouse pushes.”
Brent Gentel, Golf Course Superintendent, Starmount Forest Country Club
December 7, 2011

“There is little doubt that Agra-Rouse made a significant difference in our Champion Bermudagrass root depth and structure going into Mid to Late Fall. I strongly recommend incorporating Rouse into any plant health program.”
David Lee, Golf Course Superintendent, Hope Valley Country Club
