

# Block chain using Python

## Block Chain

Blockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system. ... Each block in the chain contains a number of transactions, and every time a new transaction occurs on the blockchain, a record of that transaction is added to every participant's ledger

## Block Chain Using Python

- Understanding Block chain
- Introduction to Python Basics
- Python for blockchain
- Understanding Digital Signatures
- Understanding Block Chain Transactions
- BlockChain based Transactions ledger
- Understanding Mining
- Proof of work
- Communication with peers
- Multi-threading
- Additional Security Concern
