SUPPLIERS TO   

What's the Problem?

Small cuts and Nicks

We Recommend:

Use JJEquine Wound Spray

First remove all debris and dirt from the wound using irrigation with warm water if possible.

JJ Wound Spray is a veterinary grade disinfectant designed to be able to be sprayed directly into a wound

After spraying into the wound allow to air dry, unless the wound requires dressing.

Repeat the process daily until the wound has healed and your horse is safe from potential infection through the wound.

NOTE: If there is a large cut, this is NOT a substitute for Veterinary care and suturing

Ingredients: Homeo-Harmonised Water (Aqua), "Sterichelle" (Alkyl Dimethyl Benzyl Ammonium Chloride & Alkyl Ethyl Benzyl Ammonium Chloride)

This product contains: no aldehydes, alcohols, chlorines, phenols or parabens for the benefit of you and your horse while protecting the environmental structure of the planet by being readily biodegradable.

"Sterichelle" has been tested effective against bacteria, viruses, moulds, fungi, spirochetes, bacterial cysts and fungal spores that are potentially harmful to your horses.

All test data is available on request.

Our mission is to blend traditional medical knowledge into the modern world for the benefit of you, your horse and the environment.

JJ Equine is a brand of Pearson & Black Ltd.
