Dirty Sheaths

Dirty Sheaths can be a real problem for some colts and stallions.

It can cause blistering, sores, redness and it can be an opportunity for infection to get a hold.

We Recommend:

The best way to treat is to firstly remove as much residue as possible.

Then wash the area thoroughly with JJ Shampoo and rinse well.

Next lightly apply JJ Professional Body Spray. This will kill any bugs that are lurking in the area.

Then apply JJ Cracked Heels and Moisturising Cream as this will ease any irritation that was being caused prior to treatment.

Repeat stages three and four until all evidence of soreness has gone.

JJ Equine is a brand of Pearson & Black Ltd.
