## Inspiration for an oil painting

Where does an artist get inspiration to create art?

---

Inspiration can come from anywhere. Really! A striking photo, the unusual placement of forms or objects, a texture, a story, a poem, a feeling, another work of art, something you see with your own eyes can inspire. Inspiration is everywhere...if you're looking for it.

For me, I love to travel and everywhere I go provides inspiration for my art. Most recently, I traveled to Sorrento, Italy and took tons of photos. Below are a few of my favorites, ones I would like to turn into oil paintings. They captured a specific moment, with just the right light - just what I want to capture on canvas.

The one I'd like to paint first, I took on an early morning walk exploring Sorrento. The lamp lights were still lit as I strolled down one of the narrow streets. Then the sky became bright orange, blue and purple with the light reflecting off the cobblestone pavement and stone walls. Now that's inspiration!

Stay tuned as I get to work and you'll see how I interpret it as an oil painting.

*Learn to make cool videos*

## Learn to make YouTube videos

If you are interested in making travel videos, send me an email (at [anthon3669@gmail.com](mailto:anthon3669@gmail.com)) and we can set up a Zoom lesson where you can create a cool video of your travel adventures. Click on the photo on the left to see a video while in Sorrento, Italy. The video is about an excellent restaurant that is a bit different. The restaurant only serves home-made pasta. The desserts are even created with pasta. This restaurant was fun and highly rated.
