

**FOR IMMEDIATE RELEASE**

**Trauma Response Systems® Named Authorized Sales Channel for Cresilon® TRAUMAGEL® in Georgia**

*Now Offering Revolutionary Bleeding Control Solution to Law Enforcement, EMS, and Hospitals Statewide*

**Atlanta, GA — June 25, 2025** — Trauma Response Systems, an emerging leader in Operational Medicine consulting, tactical medical training and equipment, is proud to announce that it has been named as an authorized sales channel for **Cresilon's TRAUMAGEL** throughout the state of Georgia. This groundbreaking hemostatic technology is now available for purchase by **law enforcement agencies, EMS providers, and hospitals** seeking rapid, effective solutions for life-threatening bleeding.

Cresilon's TRAUMAGEL represents a revolutionary advancement in bleeding control. Designed for speed, safety, and simplicity, it rapidly forms a strong mechanical barrier over wounds, helping first responders and healthcare professionals stop bleeding in seconds — without the need for complex application techniques.

"We're excited to partner with Cresilon to bring this life-saving innovation to the Georgia," said Thomas McAfee, Founder and CEO of Trauma Response Systems. "Whether in the field at the point of injury, the back of an ambulance, or an emergency room, TRAUMAGEL is an incredible advancement to help save lives and improve patient outcomes."

This partnership ensures that first responders and medical professionals in Georgia will have streamlined access to TRAUMAGEL, along with expert guidance, training, and support from Trauma Response Systems' experienced team.
