Can build upon this course and provide annual refresher courses and help develop an organic medical capability for your team.

RAPID TRAUMA RESPONSE

Industrial accidents happen and all too often, the work site is hours from a trauma center. When safe to do so, effective immediate action must be taken to treat life-threatening injuries to save lives prior to EMS arrival. It is essential that your crews master the basics of Rapid Trauma Response.

The Rapid Trauma Response course is customizable for your company's needs. Classes can range from half day to multiple days of training *AS A TEAM* to perfect the basics and build up a true critical incident response capability. Teams will train together beginning with a comprehensive classroom portion and progress to hands on skills and scenario-based training. By cross training your employees in Rapid Trauma Response, they will build solid emergency medical skills that they can count on under pressure. Your team will be prepared to perform at their best in the worst possible situation. Everyone goes home.

The mission of Trauma Response Systems is to educate, empower and outfit industrial and corporate employees with the skills, medical equipment and proficiency needed to save lives during an emergency. Trauma Response Systems' mission is simple: to bring these lifesaving skills to those in harm's way and those that may be called upon to act. You have a responsibility to get your trauma response training started. Get trained. Save
