RECYCLE

Don't toss it. Re-use it

Custom signs made from recycled materials help reduce waste and pollution, offering a cost-effective solution for your signage needs.

We provide 3mm and 5mm printed Foamex panels in various sizes, ready to be reused for your temporary signage requirements.

Saving takes many forms

The idea started with all the printed panels that were destined for the bin but why not give them a second life with your own graphics?

By applying a new printed and laminated self-adhesive vinyl over the existing print, we create a fresh sign with brand-new artwork all at a fraction of the cost. Get in touch today to see what we can do for you!

Sustainable solutions

From safety site panels to "Opening Soon" signs and temporary display boards — we can produce and deliver exactly what you need.

We offer sizes up to 800 x 2000 mm, so just let us know your required dimensions, and we'll handle the rest.
