

GLOSSARY

- **Ipamorelin/CJC:** Peptide therapy that stimulates growth hormone production, aiding in anti-aging.
- **Mega Burn:** An injection that supports metabolism and fat loss.
- **Microneedling:** A cosmetic procedure that uses tiny needles to create micro-injuries in the skin, stimulating collagen production and improving texture, tone, and firmness.
- **Pellets:** Bioidentical testosterone and/or estrogen implants inserted under the skin that release hormones slowly over time.
- **PT141:** A peptide used to enhance sexual function.
- **Retatrutide:** A peptide that activates GLP-1, GIP, and glucagon receptors to help reduce appetite and improve metabolism with no muscle wasting.
- **Sculptra:** An injectable dermal filler made of poly-L-lactic acid that stimulates collagen production to restore facial volume and reduce wrinkles.
- **Semaglutide:** A medication used to assist with weight loss by regulating appetite and blood sugar.
- **TB-500:** A peptide that helps with tissue repair and inflammation reduction.
- **Tesamorelin:** A weight loss peptide that focuses on visceral fat
- **Tirzepatide:** A medication used for weight loss and blood sugar control, similar to Semaglutide.
- **Troches:** Dissolvable hormone tablets placed in the mouth for hormone replacement.
- **Ultra Burn:** A stronger formulation designed to enhance fat loss and boost metabolism.

GLOSSARY

- **B12:** Vitamin injection that boosts energy levels and supports overall wellness.
- **Botox:** A neurotoxin that reduces the appearance of facial wrinkles by relaxing muscles.
- **BPC-157:** A peptide known for its healing properties, reducing inflammation and aiding recovery.
- **Dermafiller (PRF):** A natural injectable treatment using platelet-rich fibrin from your own blood to promote collagen production, improve skin texture, and restore volume.
- **Dysport:** Similar to Botox, used to smooth facial lines and wrinkles.
- **Enclomiphene:** A medication that boosts natural testosterone production by stimulating the body's own testosterone production.
- **Fillers:** Injectable substances used to fill wrinkles or add volume to facial features.
- **Full Panel:** A comprehensive blood test that checks for various health markers to assess overall health.
- **Glutathione:** An antioxidant injection that supports detoxification, reduces oxidative stress, and enhances cellular health.
