Construction

Features

- 2-3 times the active ingredients of competitive products
- Just one application lasts up to 8 hours
- Effective up to 1832°F (1000°C)
- Exclusive applicator ensures a thin & even coat

Benefits

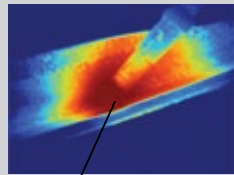

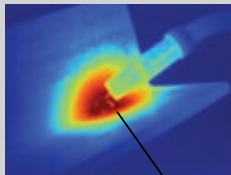

- Less downtime for maintenance
- Increased productivity
- Save money by extending the life of nozzles
- Exclusive applicator ensures no wasted product

Nozzle using
E-Weld Nozzle

Nozzle fully clogged
(not using E-Weld Nozzle)

High temperature zones
Keeps nozzle cooler for best protection

E-WELD NOZZLE is a ceramic anti-spatter that protects welding nozzles for an entire 8 hour shift. With 2-3 times the active ingredients of competitive products, E-WELD NOZZLE provides unrivaled protection of welding nozzles in manual, fully or semi-automated MIG welding applications.

This heavy duty formula is thinly and evenly coated on welding nozzles thanks to our exclusive applicator, ensuring no product is wasted and a perfect coating is applied every time.

Pro tip!

Use Pro Clean to easily clean the remaining solution off your nozzles at the end of your shift!
