

HOW TO: VISORS, BUCKETS, CAPS

Each of our style types has different width/height tolerances.

These styles typically require separate tapes due to the height/width tolerances. ACE will not allow you to put all product classes within the same section because of this.

Example: X210P and 1371 cannot be combined in the same section.

If you are trying to add a new style in a different product class, and the style is not showing, please select ["+Add New Section"](#)

Most common styles and tolerances:
