Kick-Start your Security Behaviour and Culture Program Today

Train

Engaging Narratives

'goDeep Stories' turns complex cybersecurity awareness lessons into memorable stories, ensuring deep engagement and lasting understanding.

Diverse Insights

Showcasing characters across organisational levels, goDeep demonstrates cybersecurity's universal impact, fostering a sense of shared responsibility.

Progressive Learning

From basics to advanced topics, goDeep guides learners systematically, building a strong foundation and understanding of the cyber world.

Practical Strategies

Every story ends with actionable steps, directly linking concepts to real-world defences and making cybersecurity practical for everyday life.

CyberSecurity: Humanised

By depicting real impacts and scenarios, goDeep makes the abstract field of cybersecurity relatable, highlighting the importance of digital vigilance.

Custom Content Creation

We create customised content just for you that addresses your unique organisaitonal challenges, risks, policies and procedures.

Test

Realistic Simulations

'goDeep Phishing' simulates phishing attacks on your organisation, teaching recognition and response skills.

Spear Phishing and BEC

We send phishing emails that appear to come from your colleagues, simulating spear phishing and business email compromise attacks.

Exposure and Measurement

We believe that continuous exposure to phishing sims is both an invaluable training aid and also a useful measurement of risk in your organisation.

Craft Bespoke Phishing sims

Create bespoke spear phishing sims for individuals or groups using our menu system to select template, subject, sender and recipient.

Schedule Regular Simulations

Phish on a schedule so that your team continues to learn over time, giving you a rich source of information to establish your risk profile.

Automatic Click Response

Staff caught out by phishing simulations are automatically assigned a specific phishing re-training module.

Track

Publicised Breach Notifications

'goDeep Breaches' tracks all registered email addresses and notifies you if they have appeared on publicised breaches.

Training Progress & Scoring

Our Portal tracks training progress, schedules reminders, and presents detailed reports to ensure you can demonstrate compliance.

Stats & Insights

Monitor your organisation training, phishing and breach profile through stats and insights that measure and establish risk.

Managed Service

We also offer a fully managed service that oversees your security behavior and culture program, incorporating ongoing training, assessments, and improvements to ensure your team remains vigilant and informed against evolving cyber threats.
