

Cockroach Treatment

CLIENT PREPARATION

We ask you to review and complete all the necessary preparations listed below. The following steps will ensure that your technician is able to provide an effective and safe treatment.

How To Prepare For The Service

KITCHEN

- ▶ Empty out all cupboards and food pantries.
- ▶ Empty all your drawers of cutlery, towels, etc.
- ▶ Clean and clear off all your counter tops.
- ▶ Please remove any competing food sources spills from all areas listed above.
- ▶ Keep all removed kitchen items within the kitchen Area, covered securely, to prevent cockroaches from spreading to other locations in the home.

BATHROOM

- ▶ Clear out all items from your cabinets and sink vanity drawers.

BEDROOM CLOSETS

- ▶ If experiencing cockroach issues or signs of activity, clear all closet floors and shelves. Clothes on hangers may be left in place.

FURNACE ROOMS

- ▶ Make this area accessible for the technician to properly inspect and treat.

PETS

- ▶ Remove pets from the unit (dog, cat, caged bird etc.).
- ▶ Fish tank air pump should be turned off and top covered with plastic.

ALLERGEN NOTIFICATIONS

- ▶ Some of the products we utilize for controlling bed bugs contain allergens. Please alert your technician and/or Superintendent where concerns over allergens exist prior to the treatment.

AFTER TREATMENT

- ▶ The products applied will remain effective only if the following steps are taken after your residence is serviced:
 - Remove all competing food sources (this means keeping all foods in tightly sealed containers, cleaning up spills as they occur, removing trash on a regular basis, etc.)
 - **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products near areas that have been sprayed, as this will decrease or eliminate the effectiveness of the treatments.
 - You may replace all kitchen items after the re-entry time as advised by your technician.

Reminder

▶ It is necessary for you and your pets to leave your home during the treatment and for 6 hours (or as advised by your technician) after the treatment is concluded. Fish aquariums maybe left onsite, however they should be covered and air filters must be disconnected. Persons with underlying health conditions should consult their family physician where they have concerns regarding

re-entry time.

- ▶ Upon re-entry, please open windows for atleast 20 min to properly ventilate the treated rooms.
- ▶ Please be patient, the treatment will **REDUCE COCKROACH ACTIVITY** to very low levels within approximately 2-4 weeks leading to elimination.

What You Can Expect From The Treatment

Your technician will use a variety of methods to control the pest depending on each unique situation. The majority of the treatment will focus around kitchen appliances & in areas where the infestation was detected. Your technician will be using a formulation

that is strategically applied to sites of cockroach activity. This is the most effective and efficient means of cockroach control and normally require only one treatment. All treatments will be made with your safety in mind to ensure your health.
