

| Study Method | Description | Traditional Method | AI Tools Method | Notes |
|-------------------------|--|--|---|--|
| Word Study | Focuses on individual words to understand their meanings, usage, and nuances in different contexts. i.e. Propitiation | Concordance, Lexicons, Dictionaries (e.g., Strong's Concordance, Vine's Expository Dictionary) | Language models (e.g., Copilot, ChatGPT) | AI provides quick access to word meanings, historical usage, and translations in various contexts. |
| Thematic Study | Investigates themes across the Bible to understand God's messages on specific topics. i.e. Forgiveness | Topical Bibles, Commentaries (e.g., Nave's Topical Bible, Matthew Henry's Commentary) | Perplexity, Bible.AI | AI gathers thematic references, offers instant insights, and connects related verses. |
| Contextual Study | Analyzes historical, cultural, and literary contexts of passages for better interpretation. i.e. Historical Context of Revelation | Bible Atlases, Historical References, Commentaries (e.g., Holman Bible Atlas, The Zondervan Encyclopedia of the Bible) | Context analyzers (e.g., Spirit Speaks AI) | AI helps to quickly understand the historical and cultural background of passages. |
| Character Study | Focuses on specific biblical characters to understand their roles, attributes, and impacts. i.e. Study of King David | Biographical Dictionaries, Commentaries (e.g., Smith's Bible Dictionary, Fausset's Bible Dictionary) | Character trait analysis (e.g., Bible.AI) | AI models explore character traits, actions, and significance efficiently. |
| Book Study | Examines an entire book of the Bible to understand its message, structure, and key themes. i.e. Book of Romans | Study Bibles, Commentaries, Academic Journals (e.g., The MacArthur Study Bible, The New Interpreter's Bible) | Summarization tools (e.g., Copilot) | AI provides comprehensive overviews and highlights critical points quickly. |
| Devotional Study | Combines Bible reading with personal reflection and prayer. i.e. Reflections from Psalms | Devotional Books, Prayer Guides (e.g., My Utmost for His Highest by Oswald Chambers) | Personalized devotional generators (e.g., Spirit Speaks AI) | AI offers personalized devotional content and reflections based on user needs. |

| Tool Name | Creator | AI Features | Platforms | Link | Cost |
|---------------------------|---------------------|--|----------------------|---|----------------------------|
| Bible AI | FaithLife | Advanced search engine, hand-approved Q&As | Web, Android, iPhone | https://bibleai.com/ | Free to \$10/month |
| Spirit Speak AI | Faith.Tools | Real-time answers, verse explanations, theology insights | Web, Android, iPhone | https://www.spiritspeakai.com/ | Free with in-app purchases |
| Logos Bible | FaithLife | Text comparison, passage analysis, multiple resources view | Web, Desktop | https://www.logos.com/ | \$299+ |
| The AI Study Bible | Spirit Led Software | AI-powered insights, advanced search capabilities, personalized study suggestions | Web, Desktop | https://theaistudybible.com/ | Free with in-app purchases |
| Perplexity AI | Perplexity | Real-time answers with source citations, leveraging large language models like GPT-4 and its in-house models. Additionally, it supports image and video search, customizable webpages, | Web, Android, iPhone | https://www.perplexity.ai/ | Free with premium options |
| ChatGPT | OpenAI | Conversational AI, text generation | Web, Android, iPhone | https://chatgpt.com/ | Free with premium options |
| Copilot | Microsoft | AI-powered productivity assistant | Web, Desktop | https://www.microsoft.com/en-us/microsoft-365/copilot | Free with premium options |
| Gemini | Google | Conversational AI, text generation | Web, Android, iPhone | https://gemini.google.com/ | Free with premium options |
