Summary

Would like the opportunity to secure a position as a **Well Site Drilling Foreman/Supervisor Company Man, Drilling Superintendent**, or any position where you could utilize my experience. With **44 years oil field experience** starting with the drilling contractor and working my way thru the oil industry in the service side, then moving on to the operator as **senior drilling foreman/supervisor for 21 years** and **superintendent for offshore drilling operations the last 3 years** has given me the experience, knowledge, and confidence to handle any challenge.

Skills

- Management and leadership skills to deliver results.
- Multi-Talented with a broad spectrum of oil field experience.
- HSE trained and orientated, attending & leading weekly, pre tour, and pre job safety meetings, to encourage and motivate a safe environment.
- Safety orientated managing risk to acceptable levels utilizing the latest risk assessment tools.
- Use proper mentoring technics to coach, share knowledge and develop the future leaders.
- Capable of managing several rigs at a drilling superintendent level.
- Wellsite management and supervision onshore, inland, or offshore.
- Maintain good communication with management, engineering, and client to achieve goals and deliver optimum results.
- Decision making skills utilizing all resources and parties involved to achieve positive results.
- Monitor operations, drilling contractor, and service companies to reduce and/or eliminate waste, standby and related cost.
- Flexible working schedule. Can work long durations or from start to finish on drilling and/or completion projects.
- Problem solving & prevention planning strategies for stuck pipe, well control, and loss circulation, and drilling issues.
- Monitoring and forecasting operations for planning logistics and service companies to prevent costly nonproductive time (NPT).
- More operation skills listed under work experience.
