

**DR. HEGBY**

INT. DR HEGBY'S OFFICE

DR. HEGBY, 50's examines Grace's heart with a stethoscope.

DR HEGBY

So how long have you been having  
these pains?

GRACE

The last few days I guess.

He looks into her eyes with the Ophthalmoscope.

DR HEGBY

Any change in your sleep or eating  
pattern?

GRACE

Sleep, what's that? I've been  
running on fumes for a year.

His listens to her heart with a stethoscope.

DR HEGBY

Your heart sounds a little  
stressed. I think what we are  
dealing with here is severe  
hypertension. I fear if there isn't  
a change you could suffer a severe  
stroke.
