Revised 6/07/23

Pressure Injury Landmarks

d

SCOTT TRIGGERS ASSESSMENT	Does it meet these qualifications?	If YES, please place check here
Age	Age 62 or older	
Serum Albumin	Albumin level	
g/dL	<3.5g/dL	
or	or	
BMI	BMI <19 or >40	
ASA Score (circle)	ASA score 3 or	
1 2 3 4 5	greater	
Estimated surgery	Surgery time	
time in	over 3 hours or	
hours/minutes	180 minutes	
Two or more	HIGH RISK	IMPLEMENT
YESSES =	SURGICAL	OR SKIN
	PATIENT	BUNDLE

	OR SKIN BUNDLE SAMPLE	
	Preoperative risk and skin assessment	
	Safe Patient Handling Mobility (SPHM) technology	
	Pressure-redistribution support surfaces	
	Offload heels with device, keep knees in slight	
	flexion	
	Pad high-risk areas with gel, foam, air, or fluidized	
	position aides	
	Prophylactic dressings to high-risk areas e.g.,	
	Sacrum	
	Do not use blanket rolls, IV bags for positioning	
	Do not position on critical devices	
	Reposition "micro-shifts" during procedure if	
	possible	
	Maintain normothermia and microclimate	
	Handover communication and documentation	
	Report all pressure injuries within 96 hours to QI
